

XtremeLabs

Self-Service Student Guide

Welcome to XtremeLabs, a service of XtremeLabs, LLC. This document provides students step-by-step instructions on how to:

- Create an account.
- Add course codes.
- Use your virtual labs through the self-service portal.
- Troubleshoot connectivity issues.

System Requirements

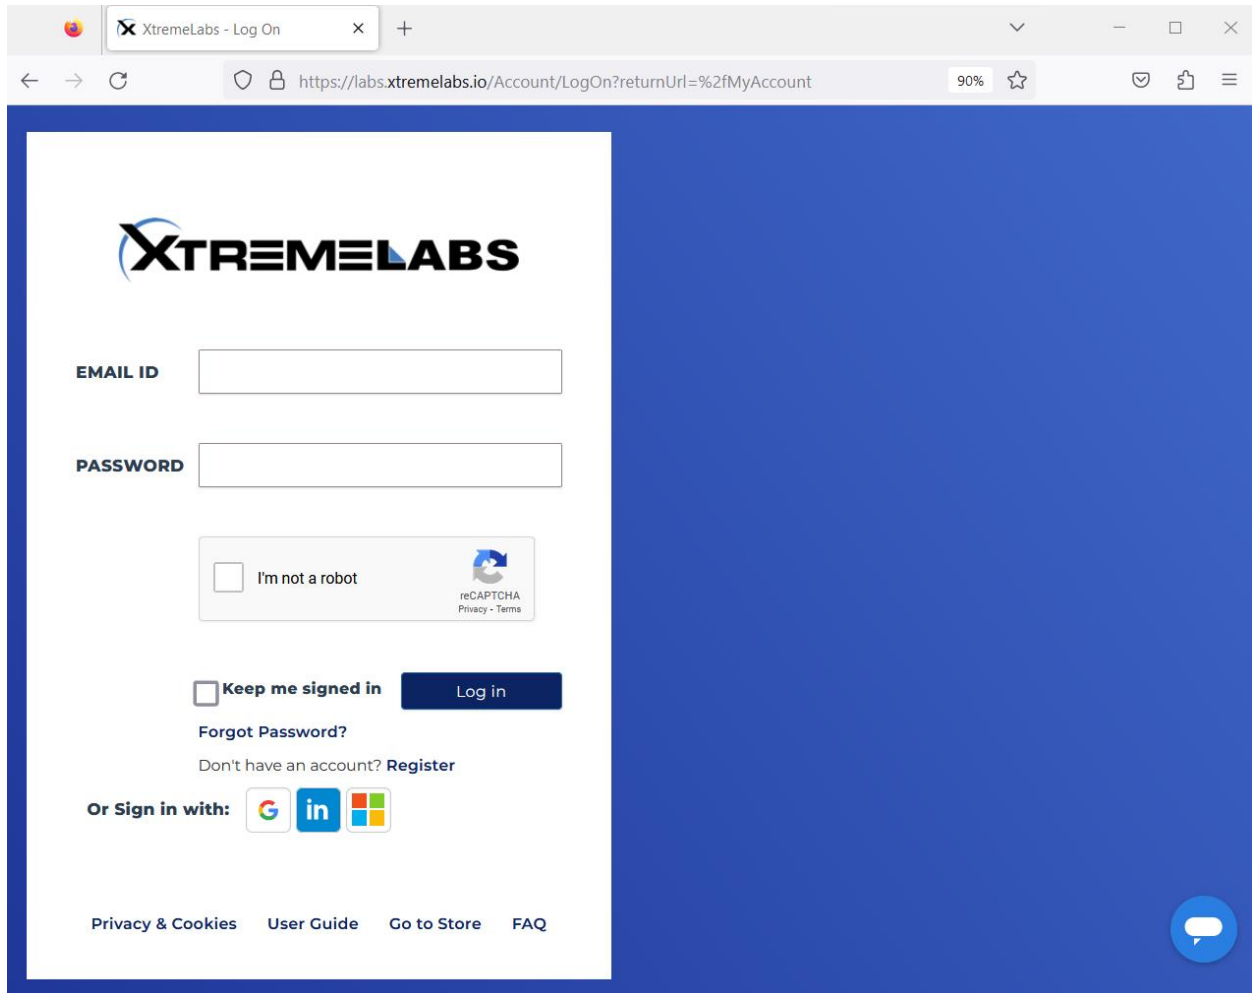

To access the lab hosting system, your client system must meet the following requirements:

	ActiveX Requirements	HTML5 Requirements
Windows XP SP3 or later (Windows RT is not supported)	x	x
.NET Framework 3.5 or later	x	x
Browser	Internet Explorer 7+	Microsoft Edge Internet Explorer 10+ Google Chrome 39+ Safari 7+
Minimum Kbps per user network bandwidth	128 Kbps	256 Kbps
Ideal screen resolution is above 1280 x 1024	x	x
Viewer Installation	Local Admin	N/A
TCP ports 80 and 443 open with inbound/outbound access to the Internet	x	x
For some corporate firewalls, a proxy client (such as Forefront TMG Client) may be required	x	N/A

Create an XtremeLabs Online Account

The first step to accessing your virtual labs will be to create an account on the XtremeLabs portal.

1. In your browser, navigate to <http://labs.xtremelabs.io>.

A screenshot of a web browser displaying the XtremeLabs Log On page. The browser's address bar shows the URL "https://labs.xtremelabs.io/Account/LogOn?returnUrl=%2fMyAccount". The page features the XtremeLabs logo at the top. Below the logo are two input fields labeled "EMAIL ID" and "PASSWORD". Underneath these fields is a reCAPTCHA widget with the text "I'm not a robot" and a "Log in" button. There are also links for "Forgot Password?", "Don't have an account? Register", and "Keep me signed in". At the bottom, there are social media icons for Google, LinkedIn, and Microsoft, with the text "Or Sign in with:". The footer contains links for "Privacy & Cookies", "User Guide", "Go to Store", and "FAQ". A blue chat bubble icon is visible in the bottom right corner.

XtremeLabs enables its users to use their Google, LinkedIn, and Microsoft account to register and log into the XtremeLabs portal (www.labs.xtremelabs.io). The sign-in functionality integrates to the users' **Google, LinkedIn, and Microsoft** accounts. If a user has already signed into their respective Google/LinkedIn/Microsoft accounts, they will need to choose from any icons in the bottom left corner of the Log On screen.

To log in to your account, you need to encounter a ReCaptcha challenge. Follow these steps to successfully complete ReCaptcha:

- **Look for the ReCaptcha:** After entering your credentials, you will see a ReCaptcha widget on the login screen. It typically appears as a checkbox or a set of images.
- Complete the ReCaptcha
- **Checkbox Verification:** You will see a checkbox labeled "I'm not a robot," simply click on it. In some cases, this action alone will be sufficient to verify your humanity, and you can proceed to log in.
- **Image Selection:** If you are presented with a grid of images and are asked to select specific items (e.g., street signs, vehicles, or store fronts), carefully follow the instructions. Click on the images that match the criteria mentioned. Continue until you have completed the challenge.
- **Additional Verification (if required):** Sometimes, ReCaptcha may require further verification, such as solving a puzzle or answering a question. Follow the on-screen instructions to complete these additional tasks.

- **Verification Checkmark:** Once you have successfully completed the ReCaptcha challenge, you should see a green checkmark or a similar indication that you have been verified as a human user.
- **Log In:** With the ReCaptcha challenge successfully completed, you can now click the "Log In" button to access your account portal.

The screenshot shows a web browser window with the title "XtremeLabs - Log On". The address bar displays the URL "https://labs.xtremelabs.io/Account/LogOn?returnUrl=%2fMyAccount". The page features the XtremeLabs logo at the top. Below the logo, there are input fields for "EMAIL ID" (containing "studentxtreme@gmail.com") and "PASSWORD" (masked with dots). A red rectangular box highlights the ReCaptcha verification area, which shows a green checkmark and the text "I'm not a robot". To the right of this text is the ReCaptcha logo and links for "Privacy" and "Terms". Below the ReCaptcha box, there is a checkbox labeled "Keep me signed in" and a "Log in" button. Further down, there are links for "Forgot Password?" and "Don't have an account? Register". At the bottom, there is a section for "Or Sign in with:" with icons for Google, LinkedIn, and Microsoft. The footer contains links for "Privacy & Cookies", "User Guide", "Go to Store", and "FAQ". A blue chat bubble icon is visible in the bottom right corner.

If you have an account, you can sign in. If you do not yet have an account, click **Register**.

2. To create your account, fill in the fields on the **Registration** page.

Note: The email address used to create your account is also used for password reminders. It is essential to use a valid email address.

3. If you have not signed into their **Google/LinkedIn/Microsoft** accounts, you will need to enter your credentials to get registered and validate your email addresses.
4. After account registration and email validation, click **Sign Up**.
5. You will be redirected to the **View Labs** page.
6. Before you have access to any labs, this is what the View Labs page will look like:

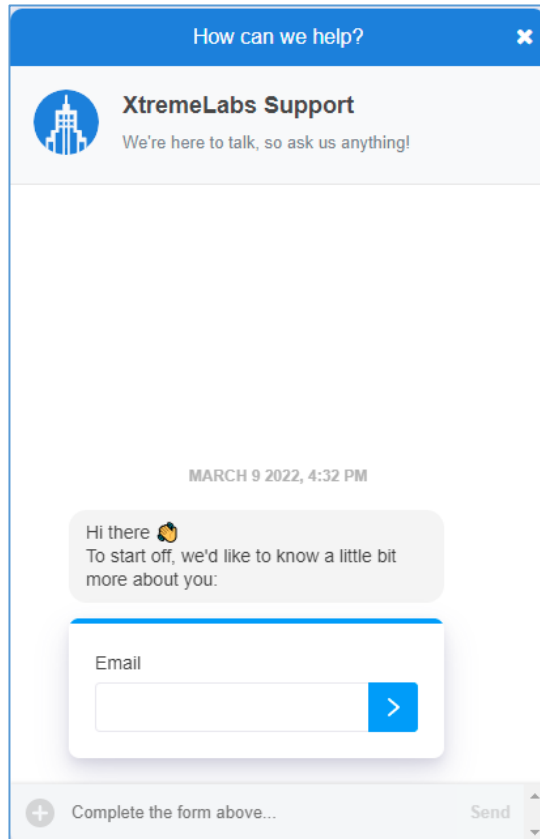

7. You can find instructions about adding Lab Access Codes on the following pages. Once you have added Lab Access Codes to your account, the labs which you can access will be listed on the **View Labs** page:

The names of labs available to you are listed in the left column. You can search for required courses by simply typing the name of that course in the **search text box** which is adjacent to the **View Labs** option. When a lab is selected (in this case, the 10265A lab), the lab modules in Lab will be displayed as tiles on the center and right areas of the window. Each lab module tile will display the lab module's Lab ID, Lab Title Duration and Status of the lab module.

On some pages, you can find the chat button at the bottom left of the screen. You can connect with XtremeLabs Support by clicking on the **Chat Icon** . By clicking the live chat icon following chat window will appear before:

Add Access Codes

1. To get access to labs, you will need to add **Access Codes** to your account. Your instructor will provide you with access codes.

To add the codes to your account, on the **View Labs** page, click the **Access Codes** icon

To open the Access Codes page.

XtremeLabs - Add code

labs.xtremelabs.io/MyAccount/AddLabCode

This training session brought to you by XtremeLabs (Demo) Powered by **XTREME LABS**

Welcome to XtremeLabs, Lab User **LU**

ADD CODE Enter your access code and select **Add code** to add a new lab to your account.

After you have entered your lab access code, it will appear in the **My Codes** list. To take your labs, select **View Labs**, then select the course from the navigation bar.

Registered MCT? Validate your credentials [here](#).

Once you have added the required **Lab Access Codes** to your account, the labs that you can access will be listed on the **View Labs** page.

Content Integration - Microsoft (MS) Learn, eReader And Additional

This feature provides learners with the ability to seamlessly access both Microsoft Learn content and supplementary external resources shared by their instructors and administrators. Instructors have the capability to record lectures, distribute surveys, share achievement code URLs, provide external readings, and deliver video or audio presentations, along with additional course materials. They can also create various activities and quizzes for their students and effortlessly share them within the lab portal and across different lab modules simultaneously. Learners can conveniently access this content through two primary channels:

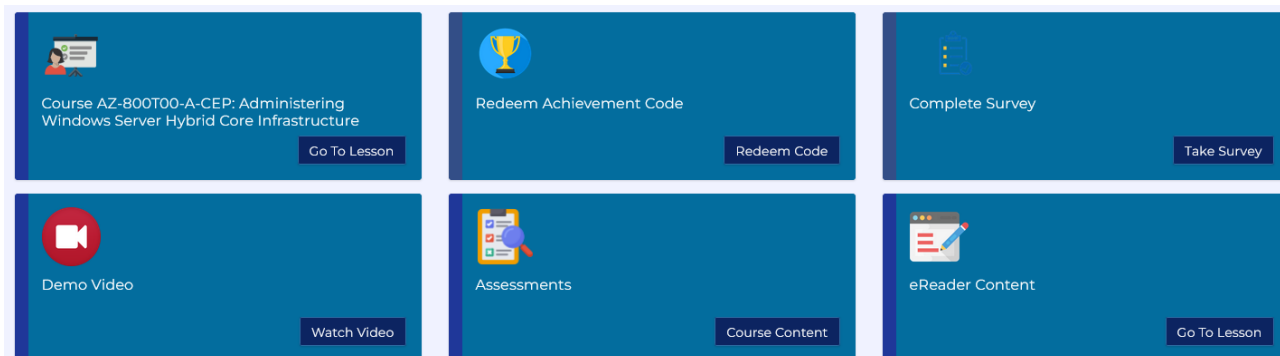

- Content Integration within the Lab Portal.
- Content Integration within the Lab Module

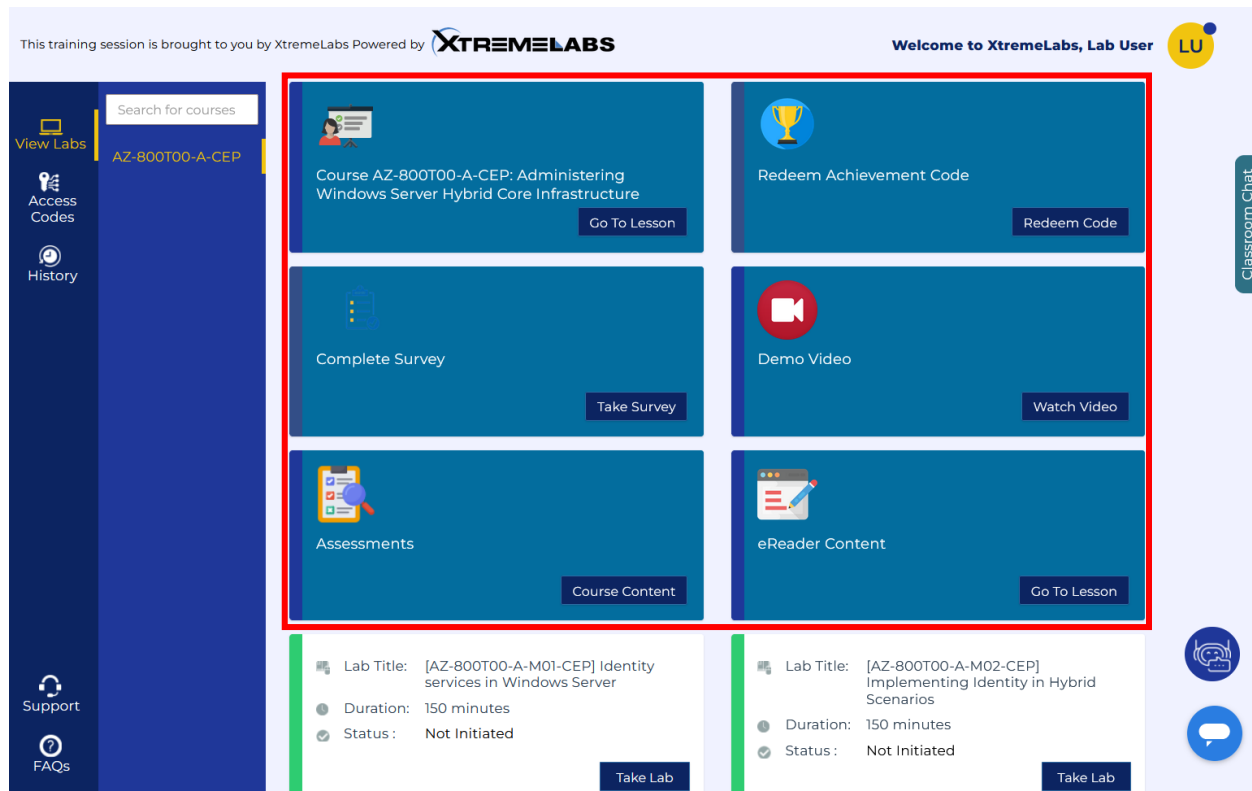

1. Course Level Content Integration in Account Portal

Learners can access course content through the account portal as they redeem their access codes. Instructors can enrich their students' learning experience by incorporating the following types of content links:

- MS Learn: Course Content (Course Level)
- MS Learn: Knowledge Check
- eReader Content
- Achievement Code Redemption URLs
- Survey URLs
- Additional Notes/Documents
- Video and Other Supplementary Materials

These tiles are presented to users within the account portal, complementing the lab modules tiles. Within each course, learners can explore specific external resources thoughtfully curated by XtremeLabs and the instructors. XtremeLabs has thoughtfully integrated Microsoft (MS) Learn content into the courses, both within the lab portal and lab modules, as a default inclusion.

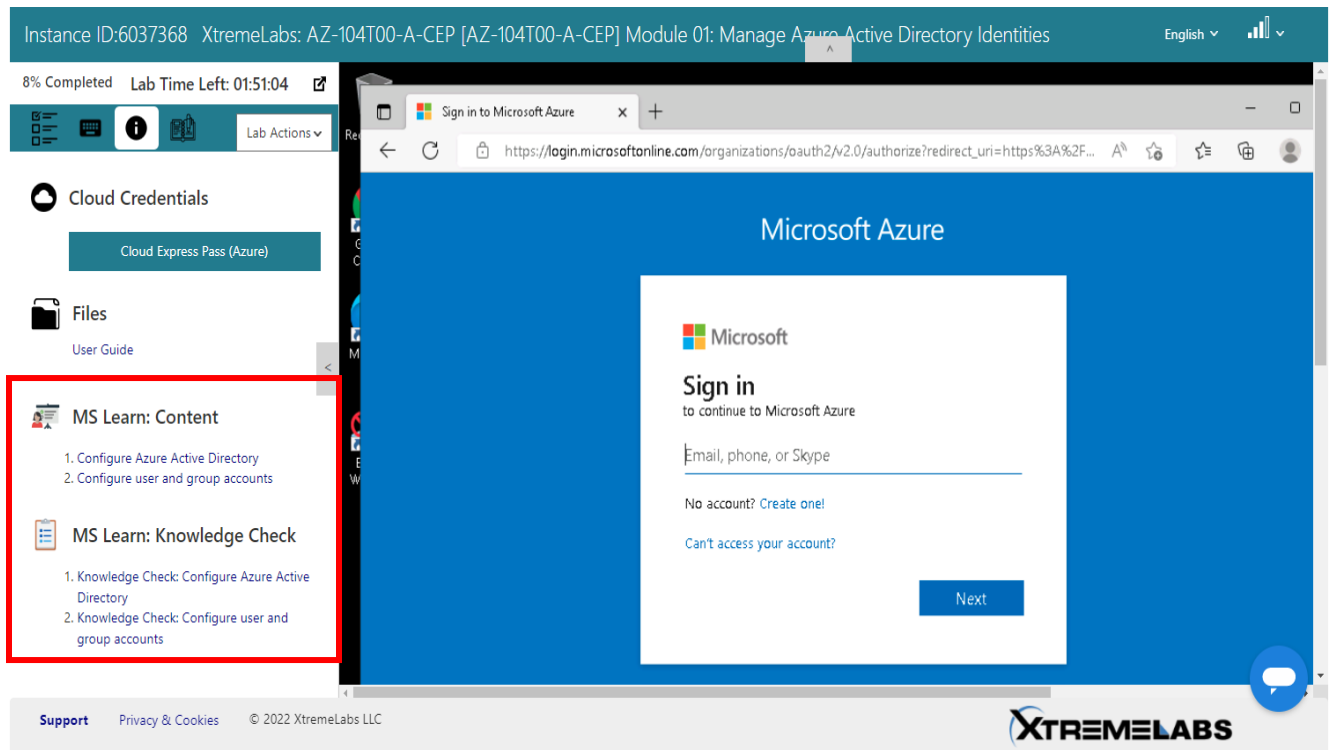

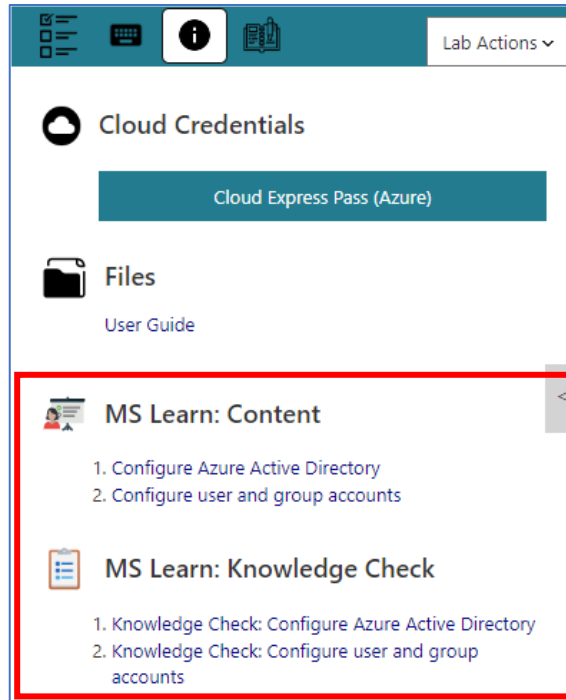

2. Module Level Content Integration in the Lab Environment

Learners can now conveniently access course content through the lab modules by launching their desired modules from the account portal. Instructors have the flexibility to enhance their students' learning experiences by incorporating various content links within each lab module, including:

- MS Learn: Course Content (Course Level)
- MS Learn: Knowledge Check
- eReader Content
- Achievement Code Redemption URLs
- Survey URLs
- Additional Notes/Documents
- Video and Other Supplementary Materials

Users can easily access these course content links by navigating to the "Lab Info" tab located alongside the VM button. Each module thoughtfully includes specific external resources curated by XtremeLabs and the instructors. Notably, XtremeLabs has thoughtfully integrated Microsoft (MS) Learn content into the lab modules by default.

Note: The MS Learn content is added by default at the course and module levels whereas, all the other additional content will only be visible to you if that has been added by your instructors or account managers.

Virtual Advisor – Ask Sina

"Introducing 'Ask Sina,' an Artificial Intelligence (AI) Virtual Advisor now seamlessly integrated into our Learning Experience Platform (LXP). Sina empowers users to swiftly obtain answers to their subject-related inquiries within mere seconds, serving as a highly sought-after alternative to contacting our round-the-clock, 24x7 technical support team. Remarkably, Sina has been meticulously trained using a comprehensive knowledge base compiled from our support team's frequently asked questions.

Our AI virtual advisor exhibits the remarkable ability to proactively anticipate the needs of our learners in real-time. It possesses the capacity to discern users' requests and deliver optimal solutions with precision, ensuring a seamless and efficient learning experience for all.

Ask Sina in Account Portal:

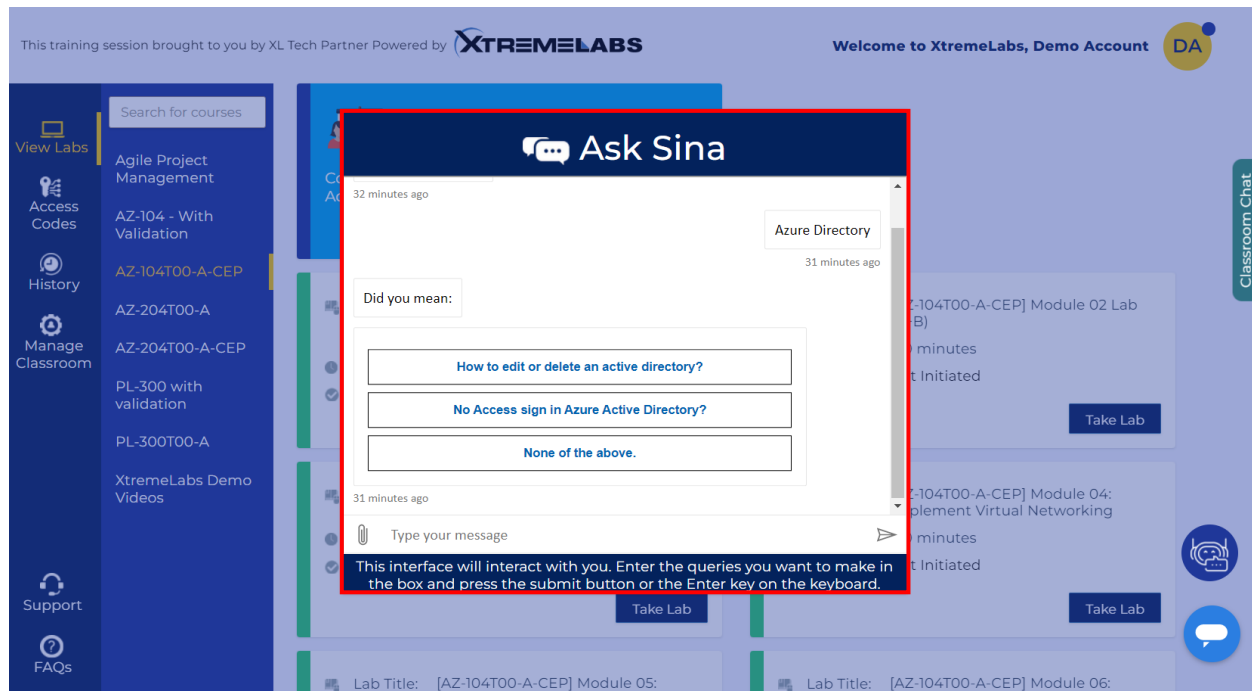

In the account portal (shown below) the Ask Sina option is available in the bottom right corner just above the support chat icon. It enables the users to get virtual assistance relating to the course they are enrolled in and provides users with more information on the topics being studied.

The screenshot displays the XtremeLabs Account Portal interface. At the top, it says "This training session is brought to you by XtremeLabs Powered by XTREME LABS" and "Welcome to XtremeLabs, Lab User LU". The left sidebar contains navigation links: "View Labs", "Access Codes", "History", "Support", and "FAQs". The main content area is divided into several sections:

- Search for courses:** A search bar with "AZ-800T00-A-CEP" entered.
- Complete Survey:** A button labeled "Take Survey".
- Demo Video:** A button labeled "Watch Video".
- Assessments:** A button labeled "Course Content".
- eReader Content:** A button labeled "Go To Lesson".
- Lab Cards:** Four cards showing lab details:
 - Lab Title: [AZ-800T00-A-M01-CEP] Identity services in Windows Server, Duration: 150 minutes, Status: Not Initiated, Take Lab button.
 - Lab Title: [AZ-800T00-A-M02-CEP] Implementing Identity in Hybrid Scenarios, Duration: 150 minutes, Status: Not Initiated, Take Lab button.
 - Lab Title: [AZ-800T00-A-M03-CEP] Windows Server administration, Duration: 150 minutes, Status: Not Initiated, Take Lab button.
 - Lab Title: [AZ-800T00-A-M04-CEP] Facilitating hybrid management, Duration: 150 minutes, Status: Not Initiated, Take Lab button.

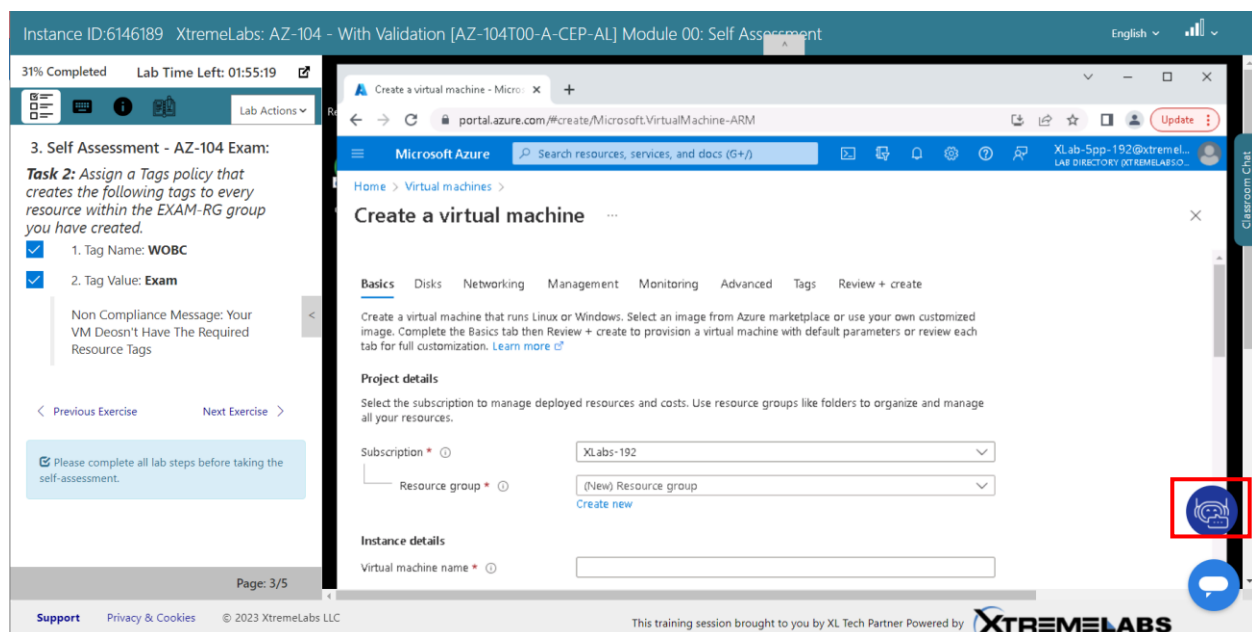

On the right side, there is a vertical "Classroom Chat" button. In the bottom right corner, there is a red box highlighting the "Ask Sina" icon (a blue circle with a white 'S' and a magnifying glass) and a "Support Chat" button (a blue circle with a white speech bubble).

Users can type their questions into the Ask Sina chat and answers will be displayed. It also predicts and offers related suggestions in response to the initial commands.

Ask Sina in Lab Environment

Ask Sina is also available in the lab environment for users to get virtual assistance and receive information without having to search elsewhere.

Instance ID:6146189 XtremeLabs: AZ-104 - With Validation [AZ-104T00-A-CEP-AL] Module 00: Self Assessment

31% Completed Lab Time Left: 01:53:31

Ask Sina

resources

Just now

1. Managed disks remain in the hands of Azure and have different advantages (speed, more options on them such as snapshots, ...). When you are browsing the resource manager you can see them as one more resource, a disk of type vhd

Differences and advantages between Unmanaged Disks and Managed Disks:

- 1. Managed disks remain in the hands of Azure and have different advantages (speed, more options on them such as snapshots, ...). When you are browsing the resource manager you can see them as one more resource, a disk of type vhd.
- 2. The NON-Managed disks remain in your hands. That is, you have to create a Storage Space, and inside said disk. This has the disadvantage

Type your message

This interface will interact with you. Enter the queries you want to make in the box and press the submit button or the Enter key on the keyboard.

Classroom Chat

The Ask Sina (AI Virtual Advisor) is different from our support chat feature which enables our users to contact our support team to get assistance with any technical lab issues. Ask Sina enables users to get subject-specific assistance.

Note: By default, the Ask Sina (AI Virtual Advisor), is enabled in the account portal and lab environment, but if your instructor or account manager has disabled it on their end, you will not be able to have access to it in the account portal and lab environment.

Lab Tiles (Progress Status)

Users can check the status of their lab completion from the account portal. The lab tiles will display the following status to the users:

- Completed
- Completed and Relaunched
- In Progress (XX% Completed)
- Not Initiated

The screenshot displays the XtremeLabs account portal interface. At the top, it says "This training session is brought to you by XtremeLabs Powered by XTREME LABS" and "Welcome to XtremeLabs, Lab User LU". The left sidebar contains navigation links: "View Labs", "Access Codes", "History", "Support", and "FAQs". The main content area is divided into sections: "Assessments" with a "Course Content" button, "eReader Content" with a "Go To Lesson" button, and a grid of lab tiles. A red box highlights the lab tiles grid. Each tile shows the lab title, duration (150 minutes), and status, along with a "Take Lab" button.

Lab Title	Duration	Status	Action
[AZ-800T00-A-M01-CEP] Identity services in Windows Server	150 minutes	Completed and Relaunched	Take Lab
[AZ-800T00-A-M02-CEP] Implementing Identity in Hybrid Scenarios	150 minutes	In Progress (36% Completed)	Take Lab
[AZ-800T00-A-M03-CEP] Windows Server administration	150 minutes	Completed	Take Lab
[AZ-800T00-A-M04-CEP] Facilitating hybrid management	150 minutes	Not Initiated	Take Lab
[AZ-800T00-A-M05-CEP] Hyper-V virtualization in Windows Server	150 minutes	Not Initiated	Take Lab
[AZ-800T00-A-M06-CEP] Deploying and Configuring Azure VMs	150 minutes	Not Initiated	Take Lab

This functionality is beneficial for the users to get a quick overview of their lab progress without having to launch the lab to check the lab completion status in lab UI.

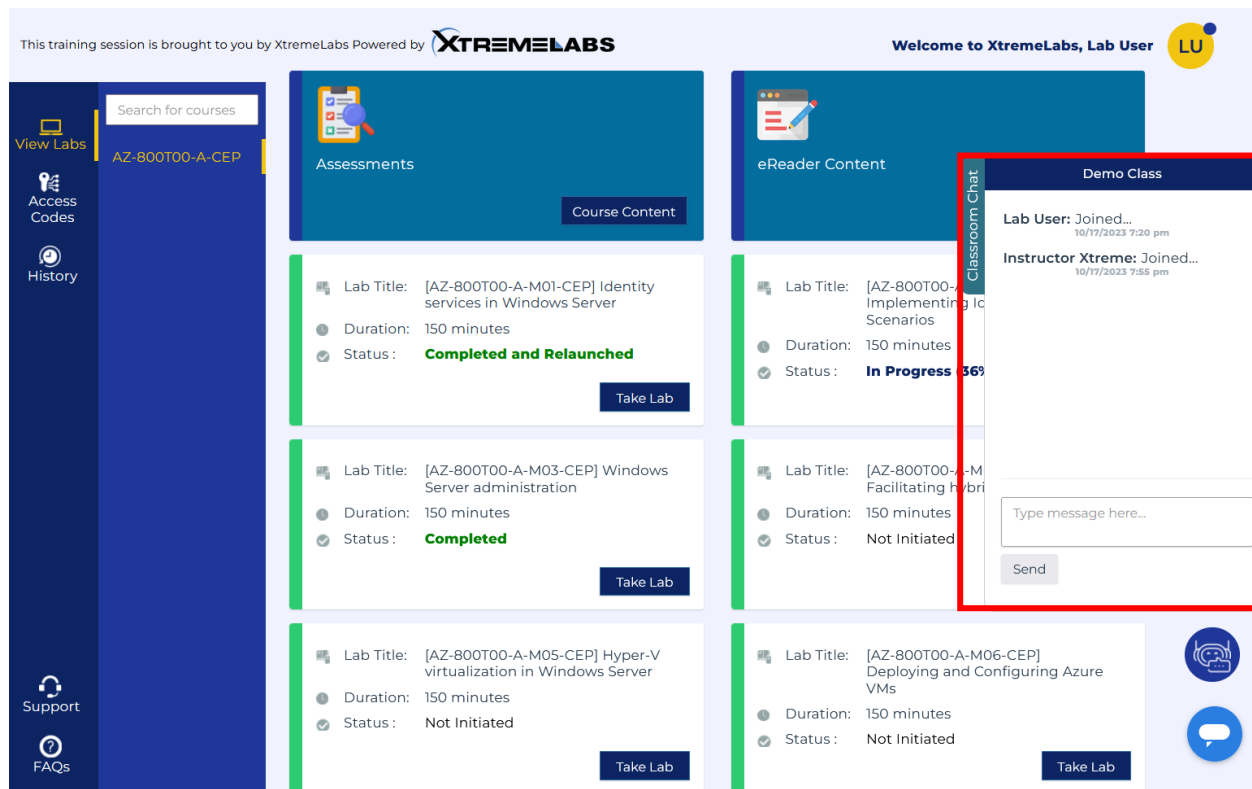

Classroom Chat Feature

This feature enables the students to have personalized learning communication with their instructors while having an experiential learning experience. Users can interact with each other during their active classroom period. The classroom chat feature will be visible to the users after redeeming their lab access codes in the account portal (<https://labs.xtremelabs.io/>).

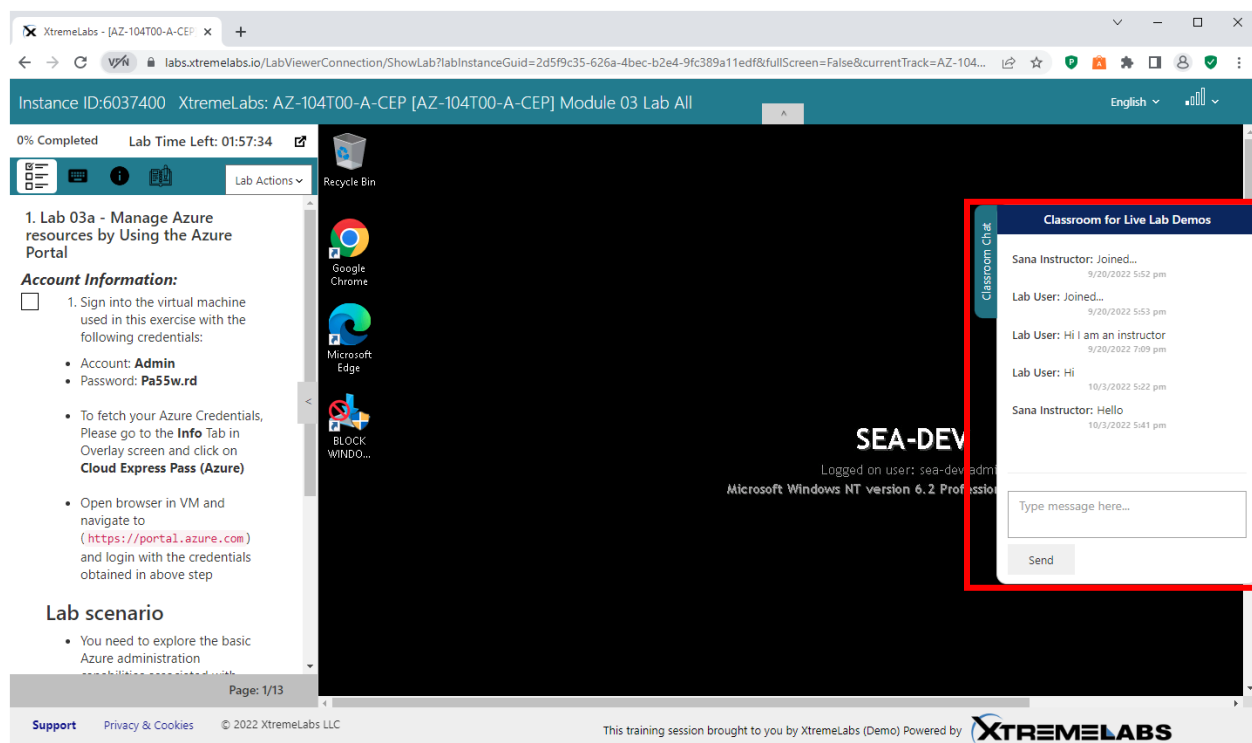

The screenshot displays the XtremeLabs Lab User interface. At the top, it says "This training session is brought to you by XtremeLabs Powered by XTREME LABS" and "Welcome to XtremeLabs, Lab User LU". The left sidebar contains navigation links: "View Labs", "Access Codes", "History", "Support", and "FAQs". The main content area is divided into two columns. The left column has a search bar and a list of labs under the heading "AZ-800T00-A-CEP". The right column has sections for "Assessments" and "eReader Content". Below these are six lab cards, each with a title, duration, status, and a "Take Lab" button. The status of the labs is: 1. [AZ-800T00-A-M01-CEP] Identity services in Windows Server (Completed and Relunched), 2. [AZ-800T00-A-M02-CEP] Implementing Identity in Hybrid Scenarios (In Progress (36% Completed)), 3. [AZ-800T00-A-M03-CEP] Windows Server administration (Completed), 4. [AZ-800T00-A-M04-CEP] Facilitating hybrid management (Not Initiated), 5. [AZ-800T00-A-M05-CEP] Hyper-V virtualization in Windows Server (Not Initiated), and 6. [AZ-800T00-A-M06-CEP] Deploying and Configuring Azure VMs (Not Initiated). On the far right, a red box highlights the "Classroom Chat" button, which is located below the "Support" and "FAQs" links in the sidebar.

1. Classroom Chat in Account Portal and Lab UI

The classroom chat feature will be visible to the users after redeeming their lab access codes in the account portal (<https://labs.xtremelabs.io/>).

The users will use the classroom chat functionality while working within their Labs UI by launching their respective labs.

2. Multiple Classroom

Having multiple classrooms running simultaneously, users will be allowed to see the latest classroom chat option in the account portal, and other classroom chats can be accessed via Lab UI. This functionality enables the users to manage their multiple classroom chats while having access to them separately.

ADD CODE Enter your access code and select **Add code** to add a new lab to your account.

After you have entered your lab access code, it will appear in the **My Codes** list. To take your labs, select **View Labs**, then select the course from the navigation bar.

Registered MCT? Validate your credentials [here](#).

Join Classroom

Note: The classroom chat feature is separate from the support chat feature, which allows the users to access technical lab support from the XtremeLabs support team.

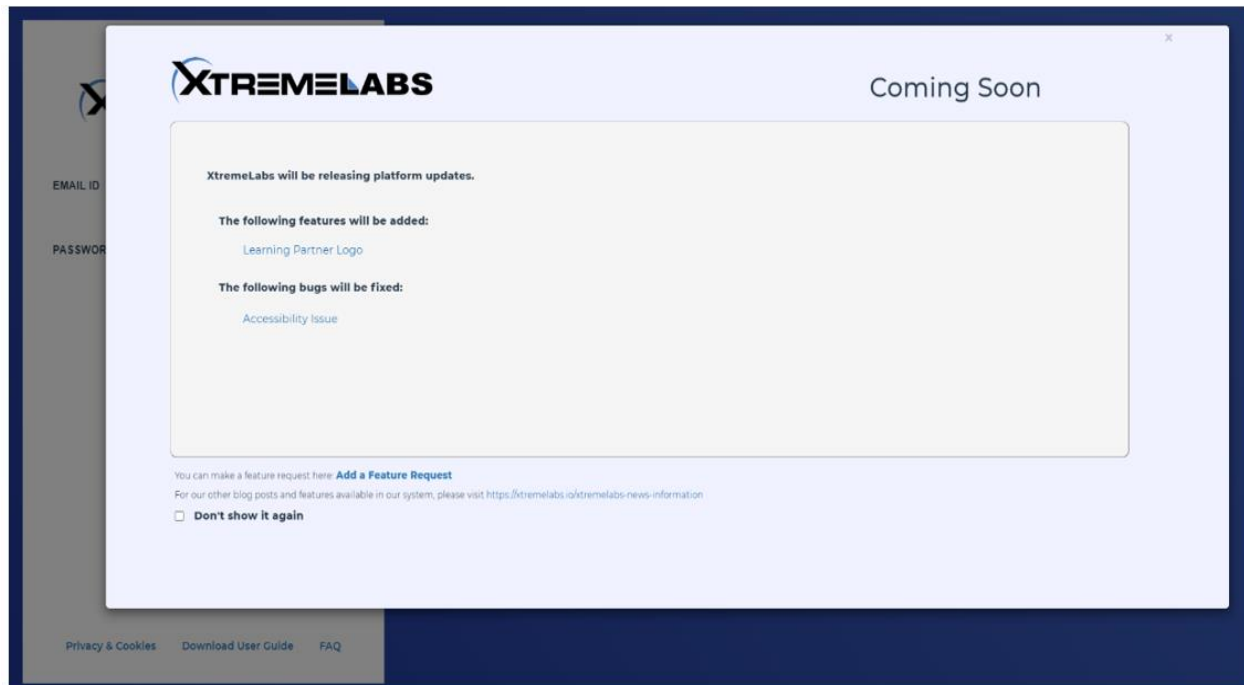

Release Notification Pop-up

A new notification feature has been incorporated in XtremeLabs' UI. This feature has the following pop-up menus.

- Pre-Release Notification Pop-up (Coming Soon Reminder)
- Post Release Notification Pop-up (Latest updates Reminder)
- Request a new Feature

Pre-Release Notification Pop-up

1. This pop-up is displayed to the user when they access the XtremeLabs login page (<https://labs.xtremelabs.io/>).

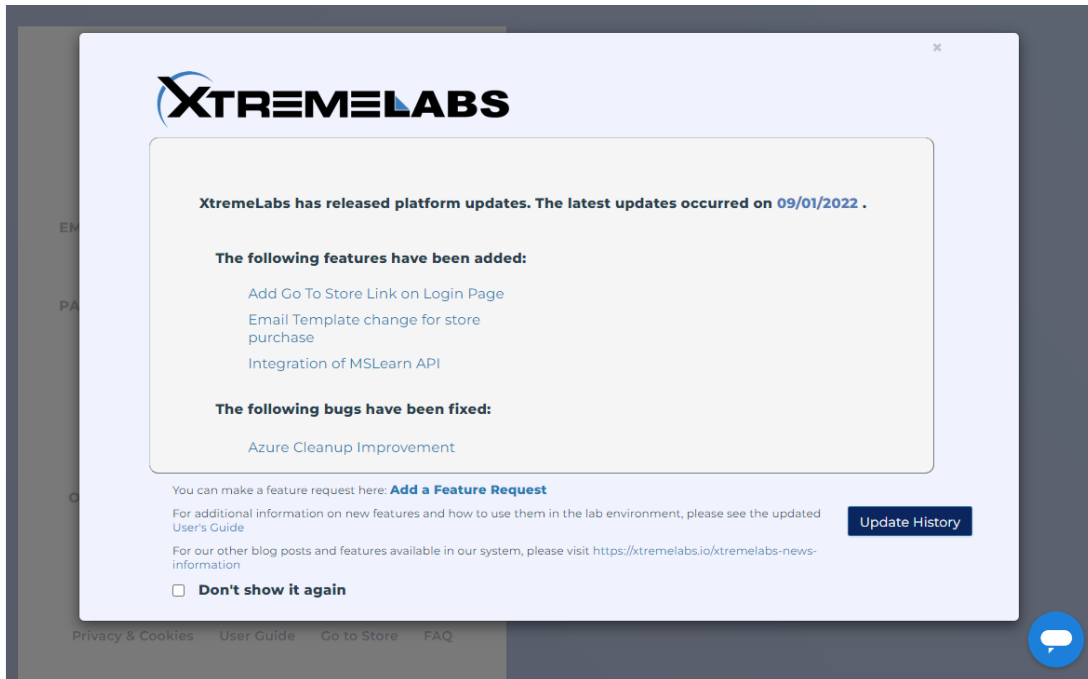

2. The pop-up is shown to the users as a reminder of any features/bugs (platform updates) included in the impending release of XtremeLabs' UI.
3. It enables the users to get the required information about the upcoming changes and be informed about the platform updates.

Note: This pop-up will only be shown before the actual release of the latest features/bugs.

Post Release Notification Pop-up

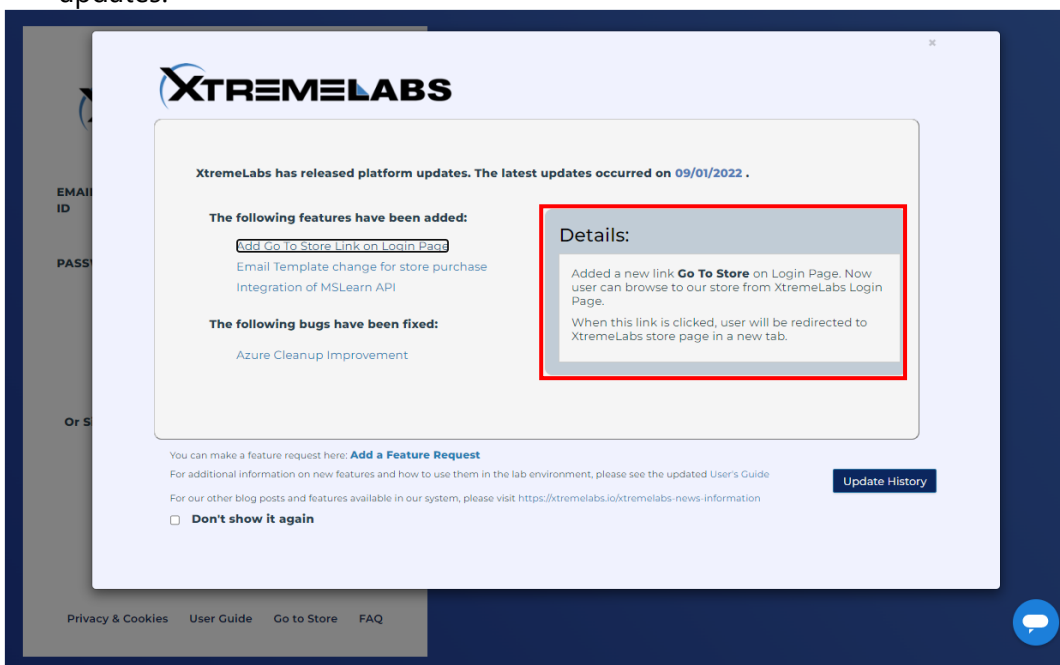

1. This pop-up is displayed to the user when they access the XtremeLabs login page (<https://labs.xtremelabs.io/>).

2. The pop-up is shown to the users as a reminder of any latest features/bugs (platform updates) which XtremeLabs' UI releases.
3. It also contains the release date of the latest updates (features/bugs).

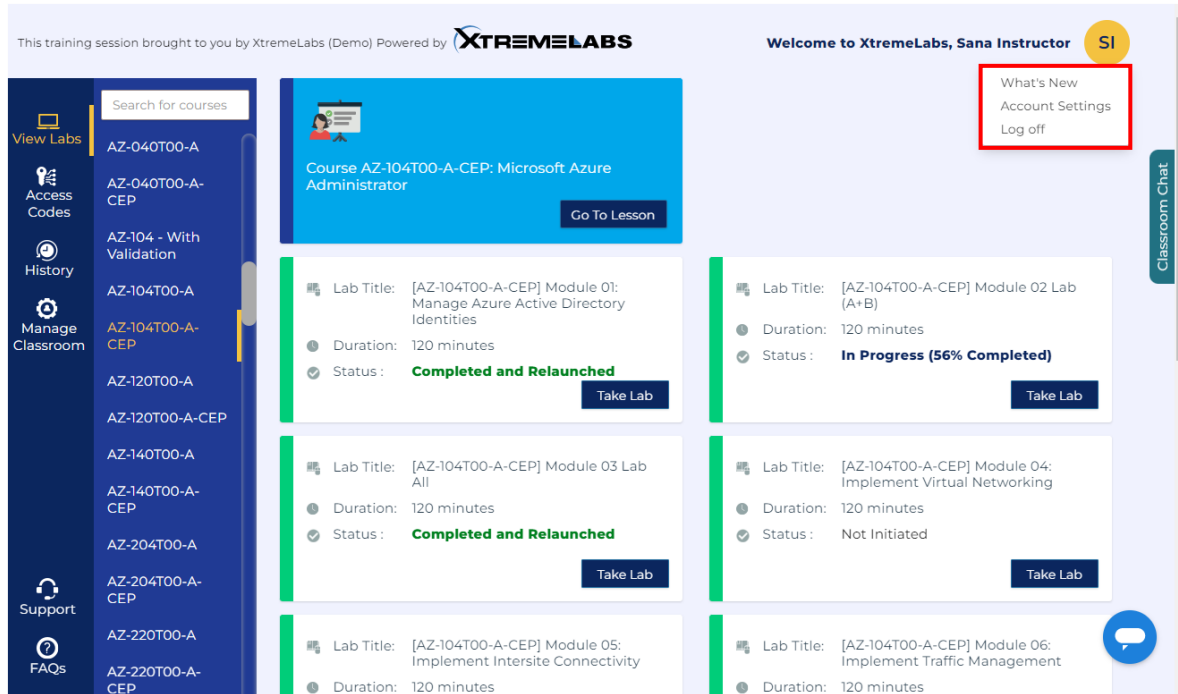

XtremeLabs has released platform updates. The latest updates occurred on 09/01/2022 .

4. Users can click on any feature/bug to read more details about the released platform updates.

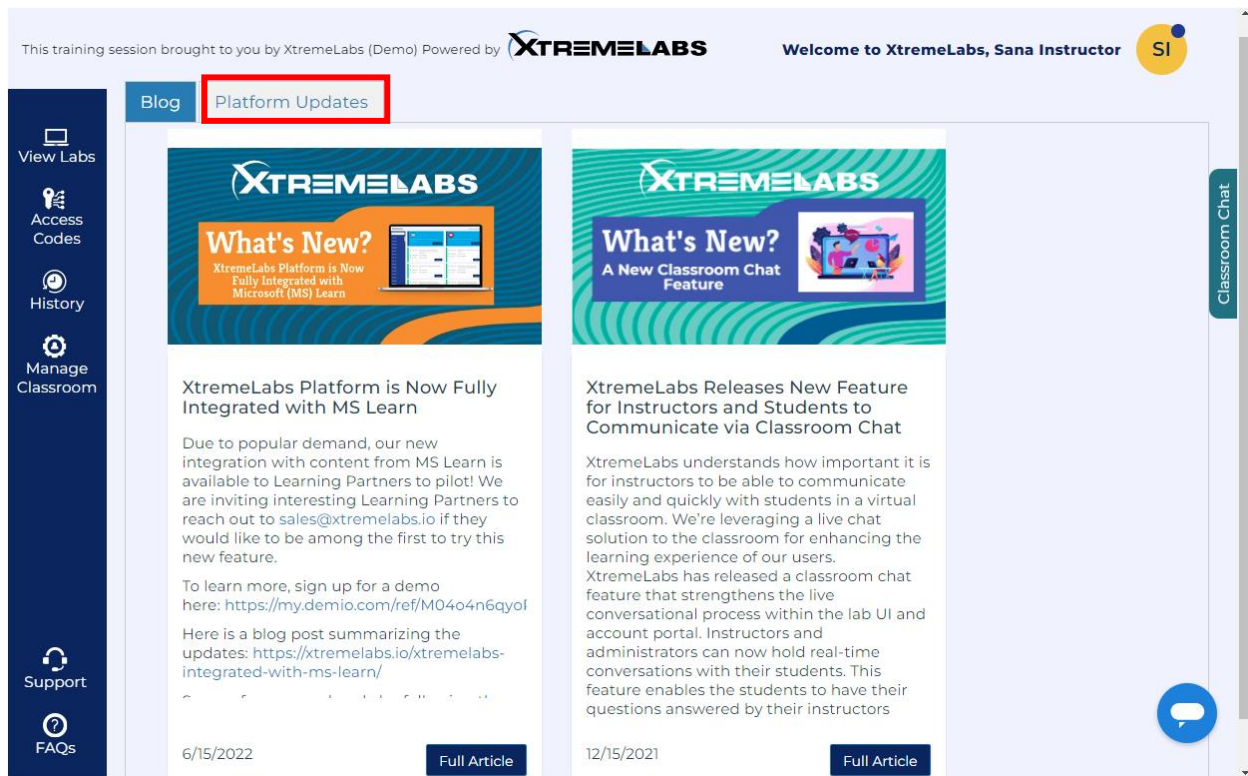

Note: This pop-up will only be shown after the release of the latest features/bugs.

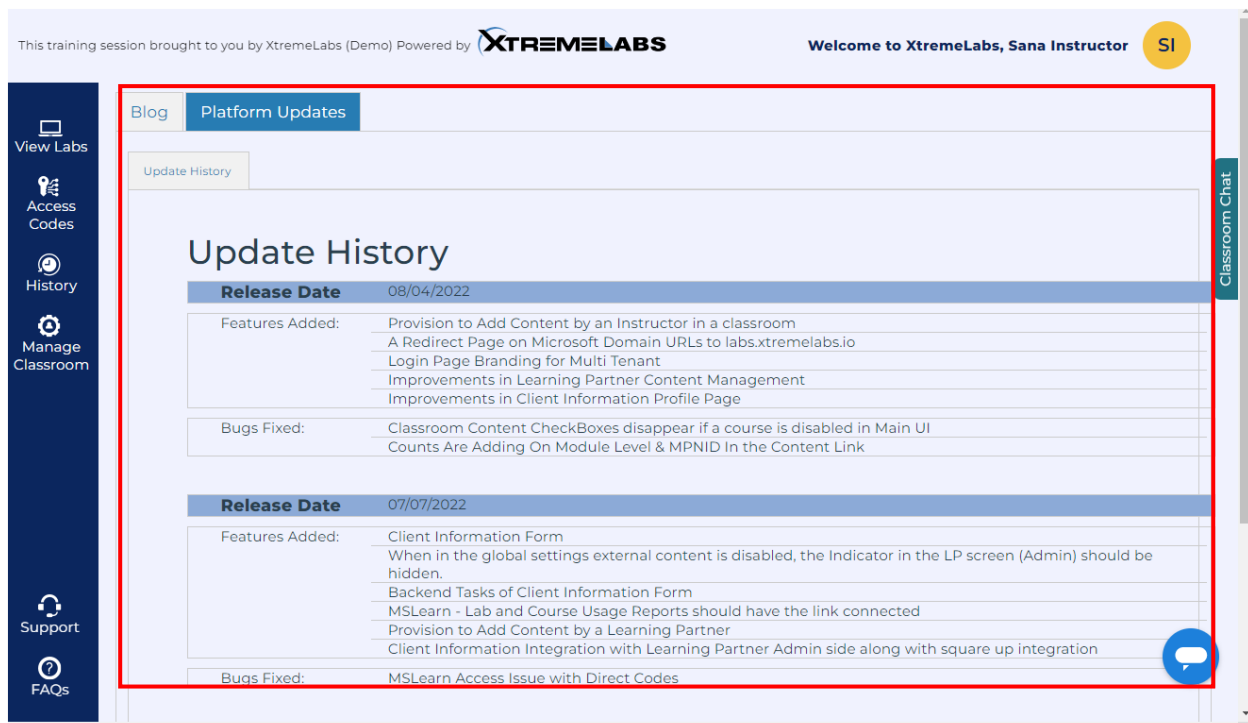

Users can also see the **Latest updates** page through the account portal by clicking on the **What's New** option in the top right corner.

By clicking on the **What's New** option, users can see the following user information page:

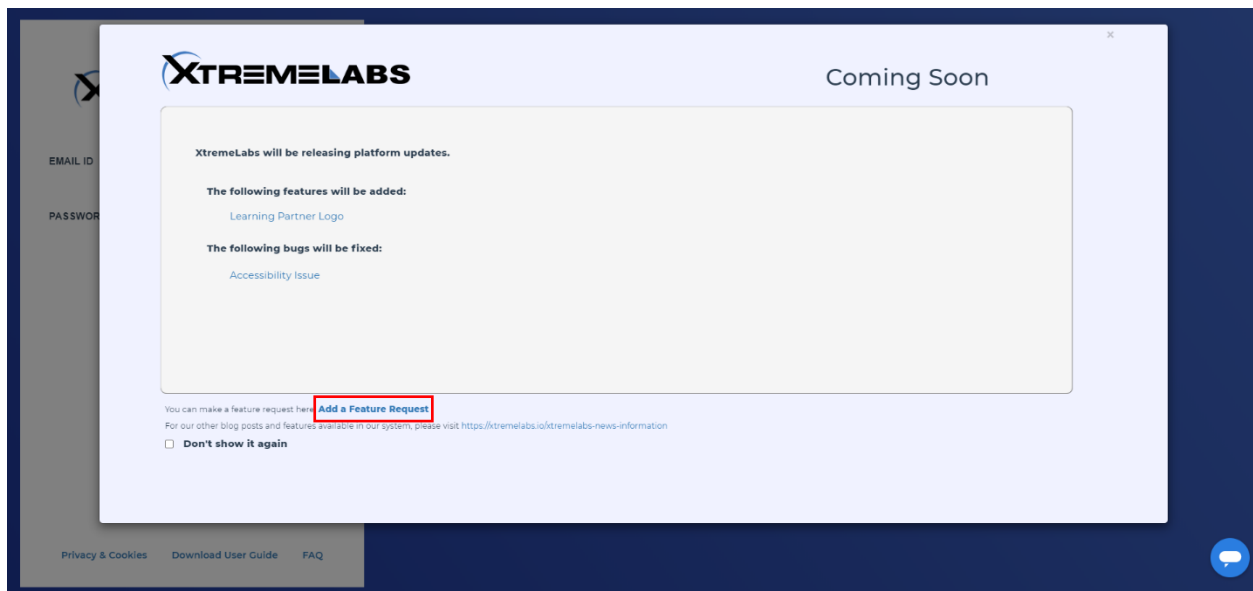

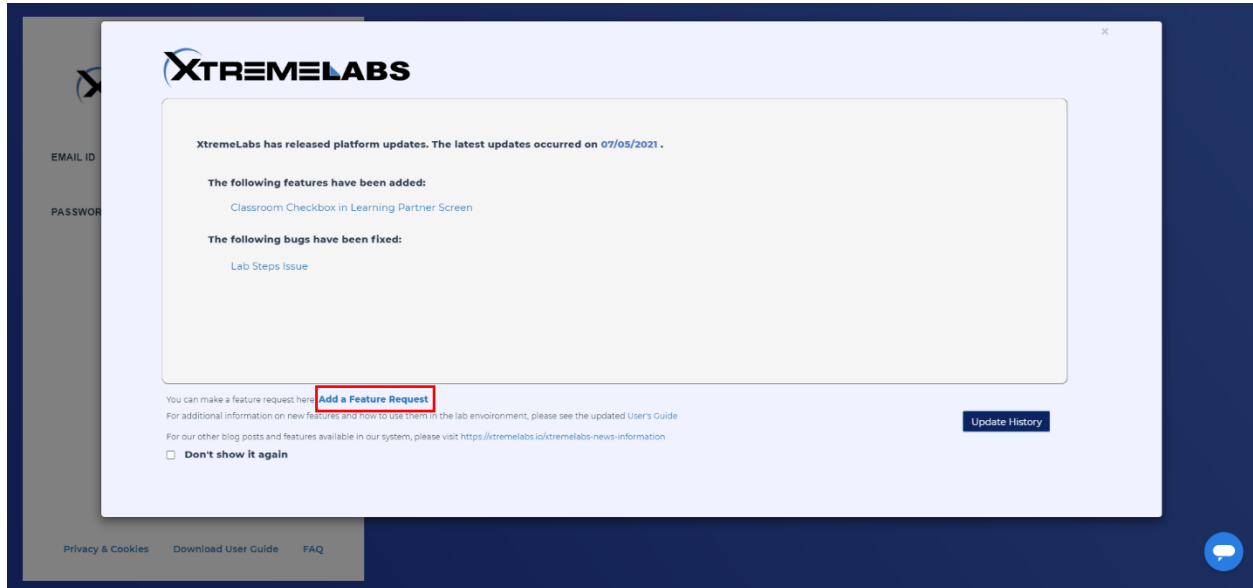

Users can access the **Latest Updates** page by clicking on the **Platform Updates** button adjacent to the **Blog** button.

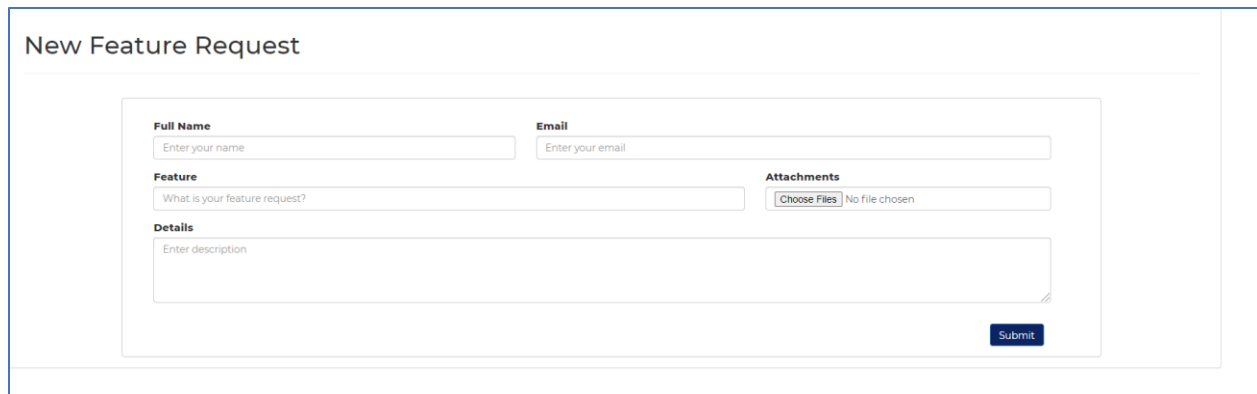

The **Latest Updates** page contains details of the recently released features/improvements of XtremeLabs UI.

Request a new Feature

XtremeLabs allows our users to request new features/improvements in XtremeLabs UI to make their learning experience more effective. The pre- and post-release pop-up notifications allow users to request their choice's features and details (screenshots).

By clicking on the **Add a Feature Request** link, users are shown the following feature request submission form:

New Feature Request

Full Name
Enter your name

Email
Enter your email

Feature
What is your feature request?

Attachments
Choose Files No file chosen

Details
Enter description

Submit

The comprehensive **New Feature Request Form** allows the users to provide a detailed description of the proposed feature update (by attaching the screenshots for reference) to communicate their needs better. It includes the following requirements:

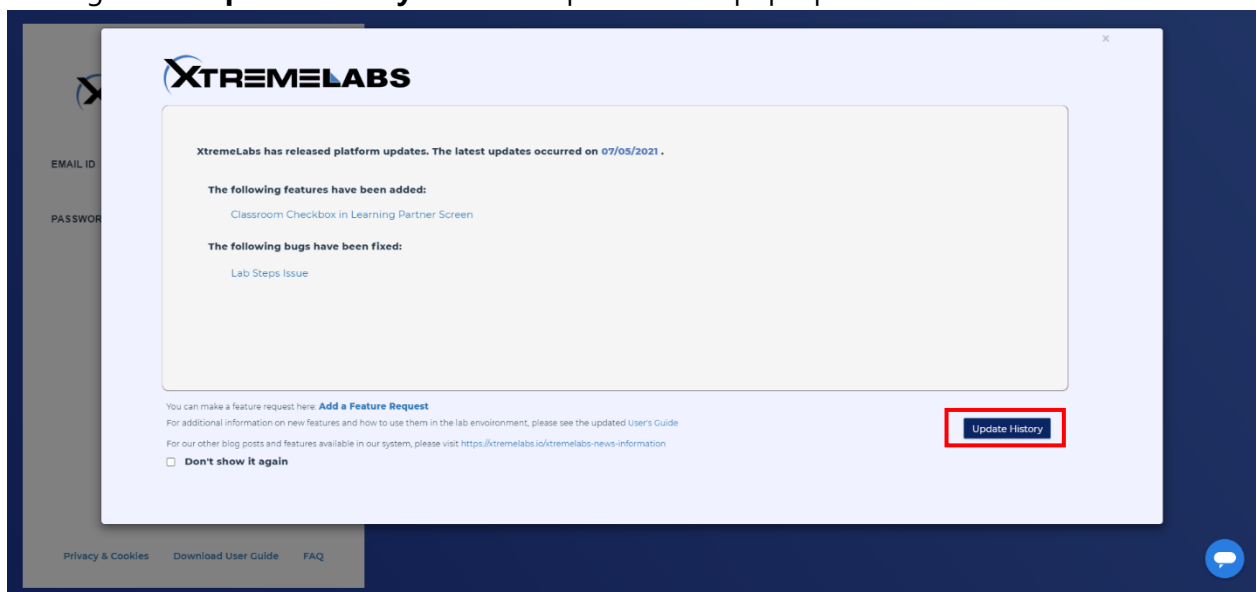

1. Full Name
2. Email Address
3. Feature Name
4. Details
5. Attachments (any relevant files)

This feature allows the users to contact XtremeLabs' teams via New Feature Request Form directly.

Note: Users will be notified once XtremeLabs received the new feature requests.

Update History

Users can access the history of all released features/improvements of XtremeLabs UI by clicking on the **Update History** link on the post-release pop-up notification.

Users can access the Update History page from the account portal by clicking on the **What's New** option on the top right side of the account portal.

This screenshot shows the XtremeLabs account portal. The header includes the text "This training session brought to you by XtremeLabs (Demo) Powered by XTREME LABS" and "Welcome to XtremeLabs, Sana Instructor" with a user icon labeled "SI". The left sidebar contains navigation links: View Labs, Access Codes, History, Manage Classroom, Support, and FAQs. The main content area has tabs for "Blog" and "Platform Updates". Two articles are displayed under the "What's New?" heading:

- Article 1:** "XtremeLabs Platform is Now Fully Integrated with MS Learn". The text states: "Due to popular demand, our new integration with content from MS Learn is available to Learning Partners to pilot! We are inviting interesting Learning Partners to reach out to sales@xtremelabs.io if they would like to be among the first to try this new feature. To learn more, sign up for a demo here: <https://my.demio.com/ref/M04o4n6qyof> Here is a blog post summarizing the updates: <https://xtremelabs.io/xtremelabs-integrated-with-ms-learn/>". The date is 6/15/2022 and there is a "Full Article" button.
- Article 2:** "XtremeLabs Releases New Feature for Instructors and Students to Communicate via Classroom Chat". The text states: "XtremeLabs understands how important it is for instructors to be able to communicate easily and quickly with students in a virtual classroom. We're leveraging a live chat solution to the classroom for enhancing the learning experience of our users. XtremeLabs has released a classroom chat feature that strengthens the live conversational process within the lab UI and account portal. Instructors and administrators can now hold real-time conversations with their students. This feature enables the students to have their questions answered by their instructors". The date is 12/15/2021 and there is a "Full Article" button.

A "Classroom Chat" button is visible on the right side of the page.

By clicking on the **What's New** option, users can see the following user information page:

This screenshot shows the XtremeLabs account portal for a user named "Henry Ron" (HR). The header includes the text "This training session brought to you by XtremeLabs (TEST) Powered by XTREME LABS" and "Welcome to XtremeLabs, Henry Ron". The left sidebar contains navigation links: View Labs, Access Codes, History, Manage Classroom, Support, and FAQs. The main content area has tabs for "Blog" and "Platform Updates", with "Platform Updates" highlighted by a red box. One article is displayed under the "What's New?" heading:

- Article 1:** "Announcing XtremeLabs' eXL Conference and Call for Speakers!". The text states: "XtremeLabs' digital hands-on learning platform has been used by 8000+ instructors at 4000 organizations. Learners from 150+ countries have launched millions of sessions on our platform as they worked hard to upskill and reskill themselves in latest technologies. We are bringing all the great knowledge and lessons by all our stakeholders together in our first annual conference. The XtremeLabs eXL Conference, Experiential Learning for All will be online and held on July 27, 2021." The date is 8/12/2021 and there is a "Full Article" button.

A "Classroom Chat" button is visible on the right side of the page. At the bottom right, there is a "Privacy and Cookies" link and a copyright notice: "© 2021 XtremeLabs LLC".

Users can access the **Update History** page by clicking on the **Platform Updates** button adjacent to the **Blog** button.

The **Update History** page contains the details of all recently released features/improvements of XtremeLabs UI. The page refreshes after three months to show the most updated information to users about the newly released features/improvements of the XtremeLabs UI.

Take a Lab

1. On the **View Labs** page, select an active course listed in the left column (see above).
2. Then select the lab module that you want to launch by clicking on the lab module's **'Take Lab'** button on the lab module's tile:

This will open the lab module's **Lab Description** box:

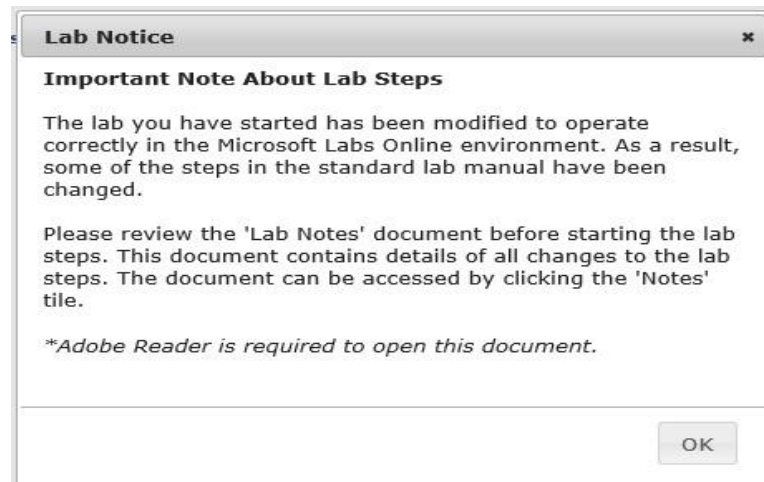

3. To launch the lab module, click on the 'Continue' button.

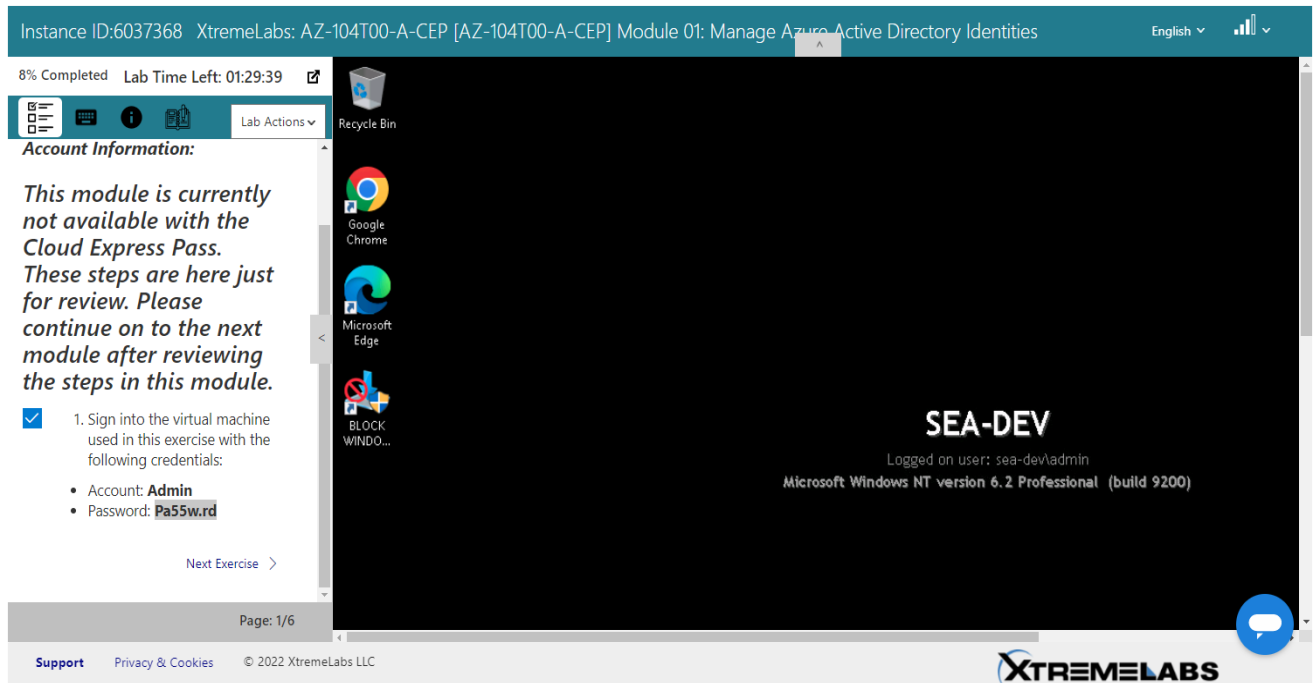

4. While your lab environment is being prepared, a "spinner" will be displayed. Typically, it takes fewer than 30 seconds to create your unique lab environment. A large lab environment might take up to 2 minutes.

Note: If your lab takes longer than five minutes to load, refresh your browser page by pressing the F5 key. If you still cannot access your lab, please alert your instructor, or contact XtremeLabs support team.

Note: Some labs have been modified from the on-premises version to operate correctly in an online environment. A "Lab Notice" message will appear after the lab loads if a lab has been altered. Clicking the **Notes** tile will launch a Lab Notes document that contains additional information regarding the changes made to the lab steps.

5. Once the lab loads and the environment is ready, your lab view will be displayed.
This is how your Lab looks like when you launch it.

How to Navigate the Lab Environment

Once your lab view is displayed, several options are available to allow you to interact with the virtual machines provided for each lab scenario. Please note that some parts of the user interface, such as the Lab Steps Overlay, will not be available in all labs.

The lab view page has ten parts:

- Top bar
- Virtual machine window
- Lab Steps Overlay
- VM Operations
- Lab Information
- Lab Notes
- Lab Actions Menu
- Detachable Lab Steps
- Footer
- Live Support Chat

Instance ID:6038704 XtremeLabs: AZ-104T00-A-CEP [AZ-104T00-A-CEP] Module 03 Lab All

Lab Completion Summary

resource group **az104-03a-rg1** |

- Disk name| **az104-03a-disk1** |
- Region| the name of the Azure region where you created the resource group |
- Availability zone| **None** |
- Source type| **None** |

Note: When creating a resource, you have the option of creating a new resource group or using an existing one.

3. Change the disk type and size to **Standard HDD** and **32 GiB**, respectively.

4. Click **Review + Create** and then click **Create**.

Note: Wait until the disk is created. This should take less than a minute.

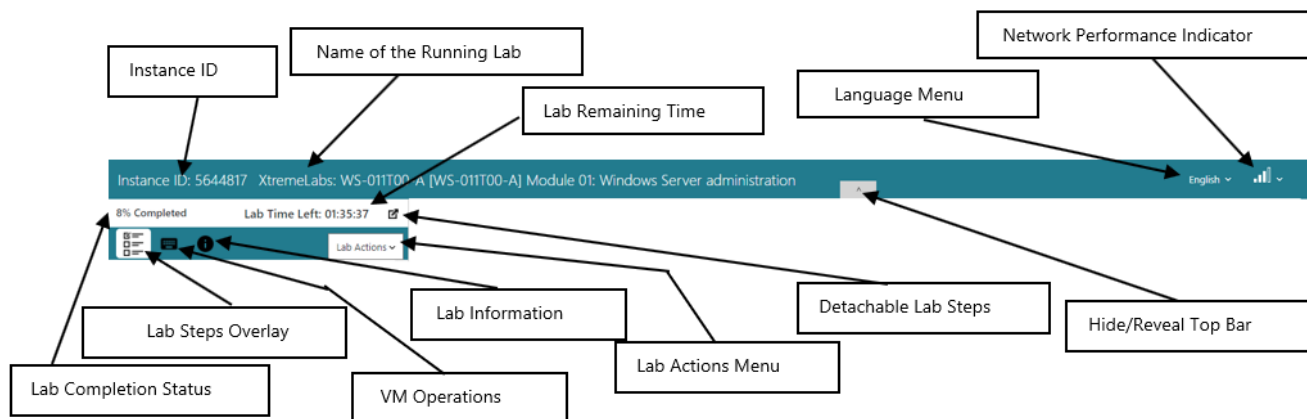

< Previous Exercise Next Exercise >

Page: 2/13

Most labs hosted by XtremeLabs include an overlay that contains the official lab steps and other information provided by the course authors. Most lab steps are organized into Tasks, and Tasks are organized into Exercises. Each task is presented on a single panel and the navigation links at the bottom of each panel move you sequentially through all the panels in the Lab. Checkboxes are provided to mark your position in the sequence of lab steps.

Top Bar

The elements in the top bar are called out and described here:

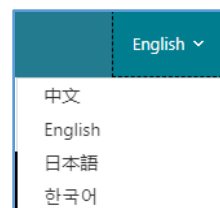

Name of running lab – This displays the name of the open lab module. If requesting support, this information will be included in the screenshot sent to the support team.

Hide/Reveal Top Bar button – Click this button to hide or reveal the top bar.

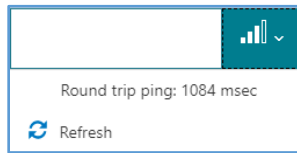

Instance ID – This contains the Instance of the open lab module. If requesting support, this information will be included in the screenshot sent to the support team.

Language Menu- This menu allows you to change the language according to your preference and understanding. The default language is usually English, depending on the course and your location.

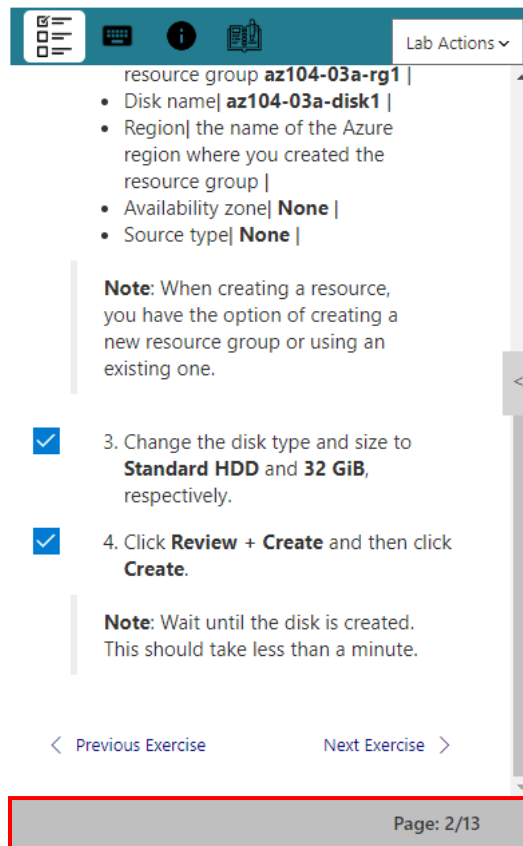

Network performance indicator – The bars show the response speed between the user's browser and the virtual machine server—the fuller the bars, the better the network performance. A drop-down arrow displays the last ping's round-trip in milliseconds and

includes a Refresh text link that initiates a new ping. The round-trip timing of the new ping is then displayed in the drop-down box and is shown in the indicator.

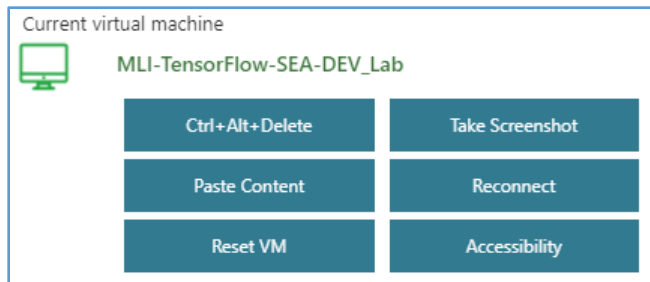

Detachable Lab Steps –  This icon allows you to move lab instructions to another tab and another available monitor.

Lab Steps/Instruction Manual –  This button contains the detailed lab steps for you and a lab completion summary in the footer, which shows your progress in the current lab module.

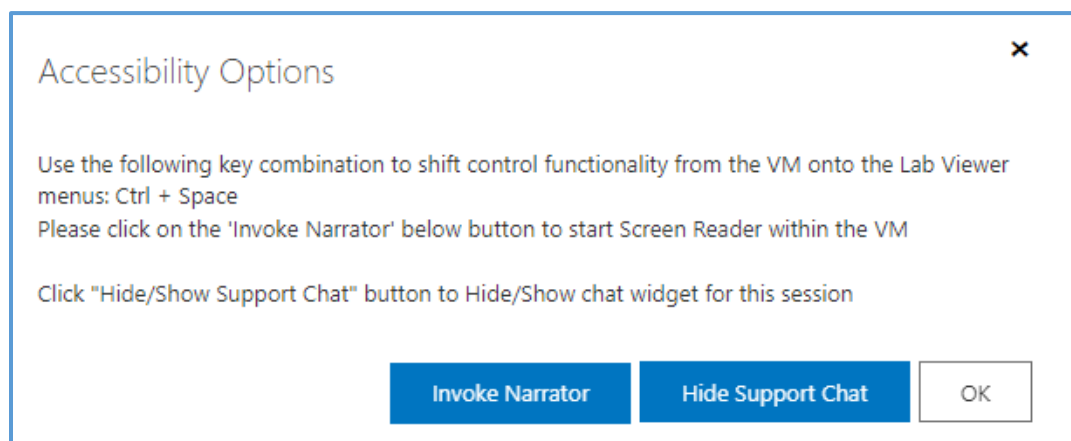

Virtual Machine (VM) Operations –  This is a button that displays the name of the current virtual machine in the running lab module. Alongside it contains all the VM operations that can be performed in the running lab module. The most common VM operations are listed below:

The action choices are:

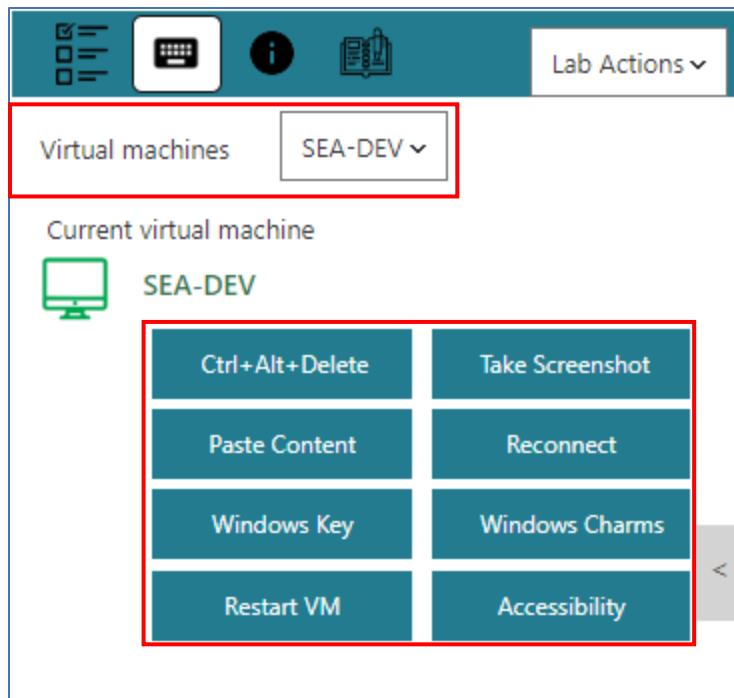

- i. **Ctrl+Alt+Delete** – Sends this command to the virtual machine.
- ii. **Take Screenshot** – Enables users to take a screenshot of their current VM.
- iii. **Paste Content** – Pops up a window that the user can input text onto to paste into the environment.
- iv. **Reconnect** – Enables the users to reconnect the VM if it gets disconnected due to several reasons.
- v. **Reset VM** – Enables the users to restart their current VMs.
- vi. **Accessibility** – Enables the users to **Invoke Narrator** and starts the screen reader functionality within the current VM.

By clicking on the **Accessibility Button**, users will see the below shown pop-up menu:

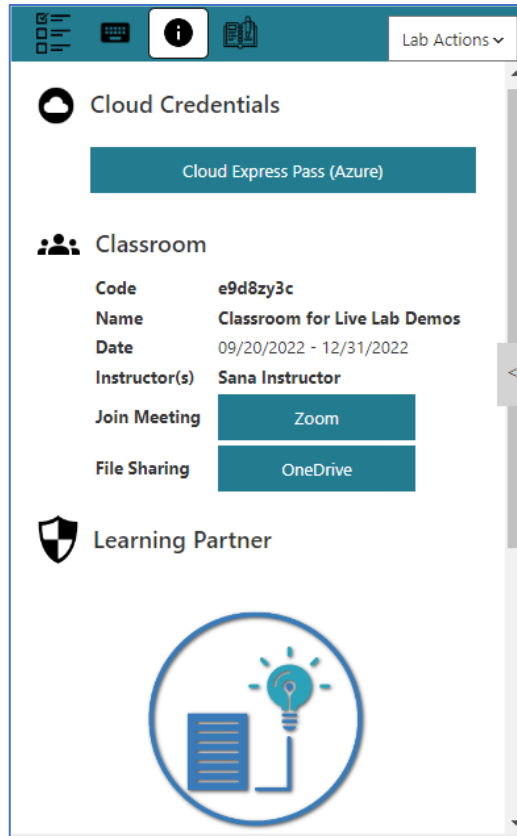

Note: There might be other options in some specific labs, **e.g., Revert VM, Reset VM, Windows Charm Window Keys, Add/Join Classroom.**

Click a specific virtual machine to open it in the virtual machine window. The virtual machine's name currently in the virtual machine window is displayed above the VM operations (actions buttons). Users can choose between the other VMs as per their lab module requirements.

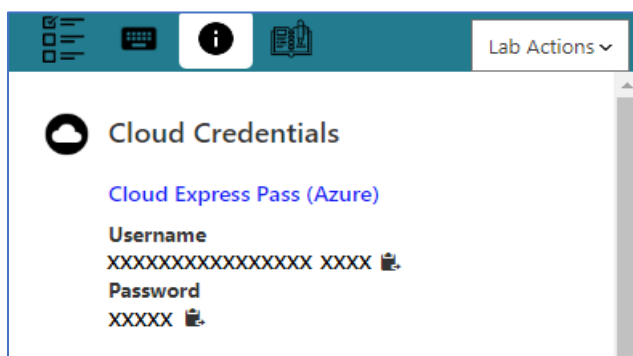

Lab Information Menu–  This menu contains the following information related to the running Lab module:

1. Cloud Credentials
2. Classroom Details
3. Files
4. External Content Links – Module Level
5. Lab Network Information

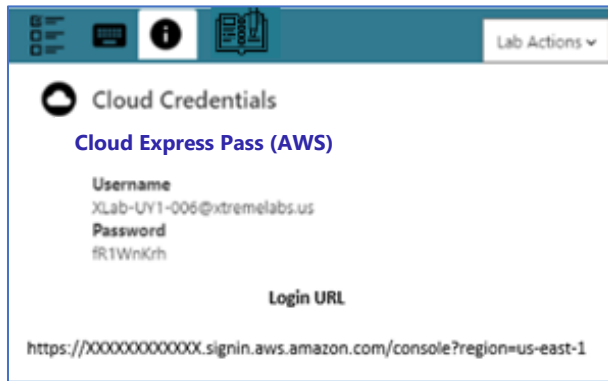

1. Cloud Credentials

- i. **Cloud Express Pass (Azure)** – This link will appear when the launched Lab requires cloud services credentials. Clicking on the **[xxxx] Credential's** link will open a pop-up window that displays the Username and Password that you will need to sign into the cloud service that has been created for your Instance of this Lab:

The Cloud Express Pass for Azure automatically generates a set of Azure credentials for you to access an Azure subscription from within the XtremeLabs Viewer UI. The Azure subscription is fully managed by XtremeLabs and does not require you to sign up for your Azure credentials.

ii. **Cloud Express Pass (AWS)**

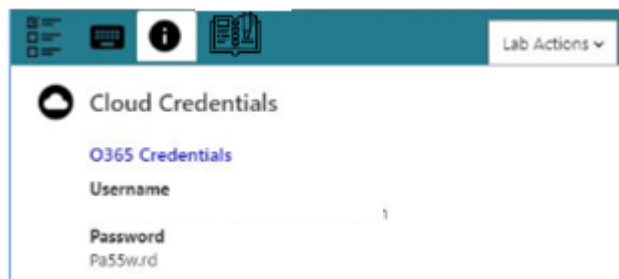

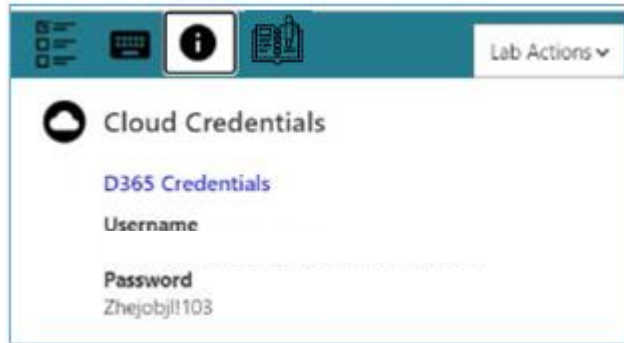

The Cloud Express Pass for AWS automatically generates a set of AWS credentials for you to access an AWS subscription from within the XtremeLabs Viewer UI. The AWS subscription is fully managed by XtremeLabs and does not require you to sign up for your AWS credentials.

XtremeLabs assigns these credentials to you for the duration of your lab session. When you end your lab session, your cloud resources will be torn down and deleted.

Note: Any work you have performed in your cloud subscription during your lab session will then be lost when you click **End Lab**. It is recommended that you use the **Save Lab** feature.

- iii. **Other Credentials** – When the launched Lab includes an Office 365 Tenant or a Dynamics 365 Tenant, this link will appear. Clicking on the **O365 and D365 Credentials** link will open a pop-up window that displays the Tenant's Email and Password that you will need to use this O365 tenant that has been assigned to you for use in this Lab:

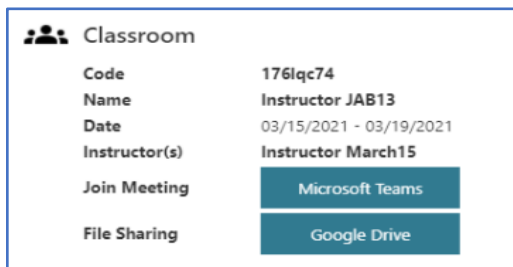

Depending on the tenant, this credential will expire in 14 to 25 days from the date it is assigned to you.

2. Classroom Details –  It contains the necessary information about the classroom created by instructors for a student, such as:

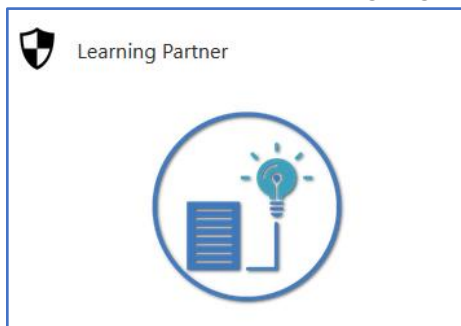

- Classroom Code
- Instructor's name
- Lab Tenure (Start Date – End Date)
- Cloud meeting details
- Cloud file sharing details

or

3. Learning Partner –  It contains the logo image of the user's affiliated organization, e.g., educational institute, training organization, or any publisher, etc.

4. Files Menu –  It contains the following resources for the users:

- i. **User Guide** – Clicking on the **User Guide** link opens a separate window where the XtremeLabs Student User Guide (this document) can be displayed and downloaded from within XtremeLabs.
- ii. **Lab Manual** – When the launched Lab includes a downloadable lab manual, this link will appear. Clicking on the **Lab Manual** link enables the downloading of the subject lab manual.

Note: Not all labs contain the downloadable lab manual.

- iii. **Lab Notes** – It contains the special notes for the students provided by the XtremeLabs Content Team.

5. External Content Links – (Module Level) It contains the external content and Microsoft Learn content links added by XtremeLabs (by default) and instructors/administrators.

MS Learn: Content

- 1. [Configure Azure Active Directory](#)
- 2. [Configure user and group accounts](#)

MS Learn: Knowledge Check

- 1. [Knowledge Check: Configure Azure Active Directory](#)
- 2. [Knowledge Check: Configure user and group accounts](#)

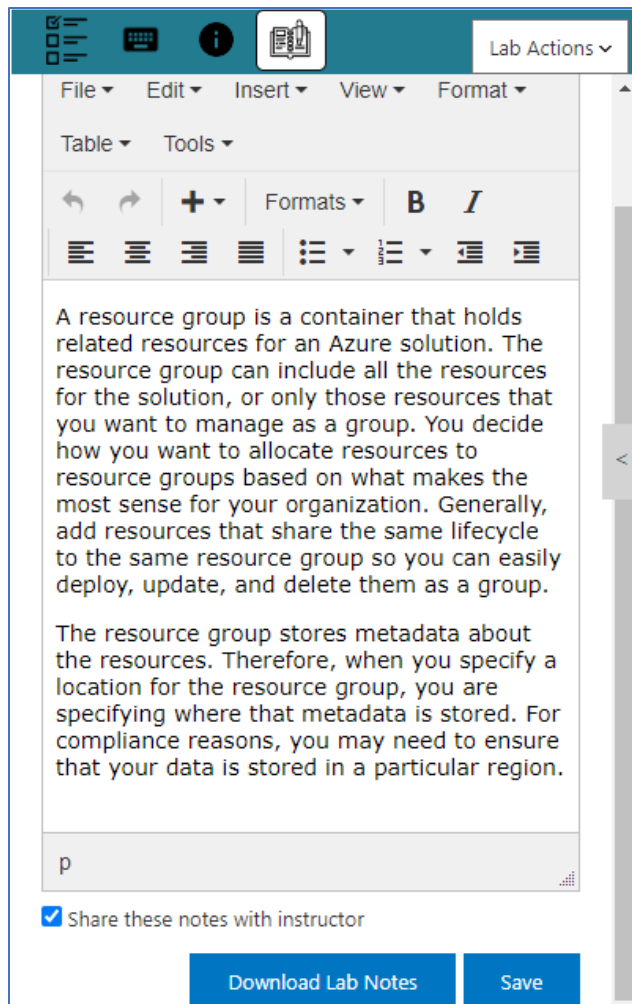

6. Lab Network Info –  It contains the necessary information on the network used in the current VM operations.

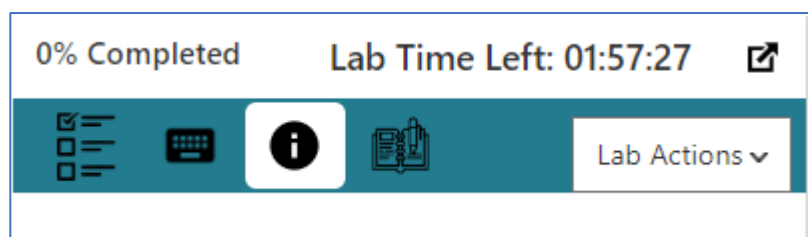

Lab Network Info

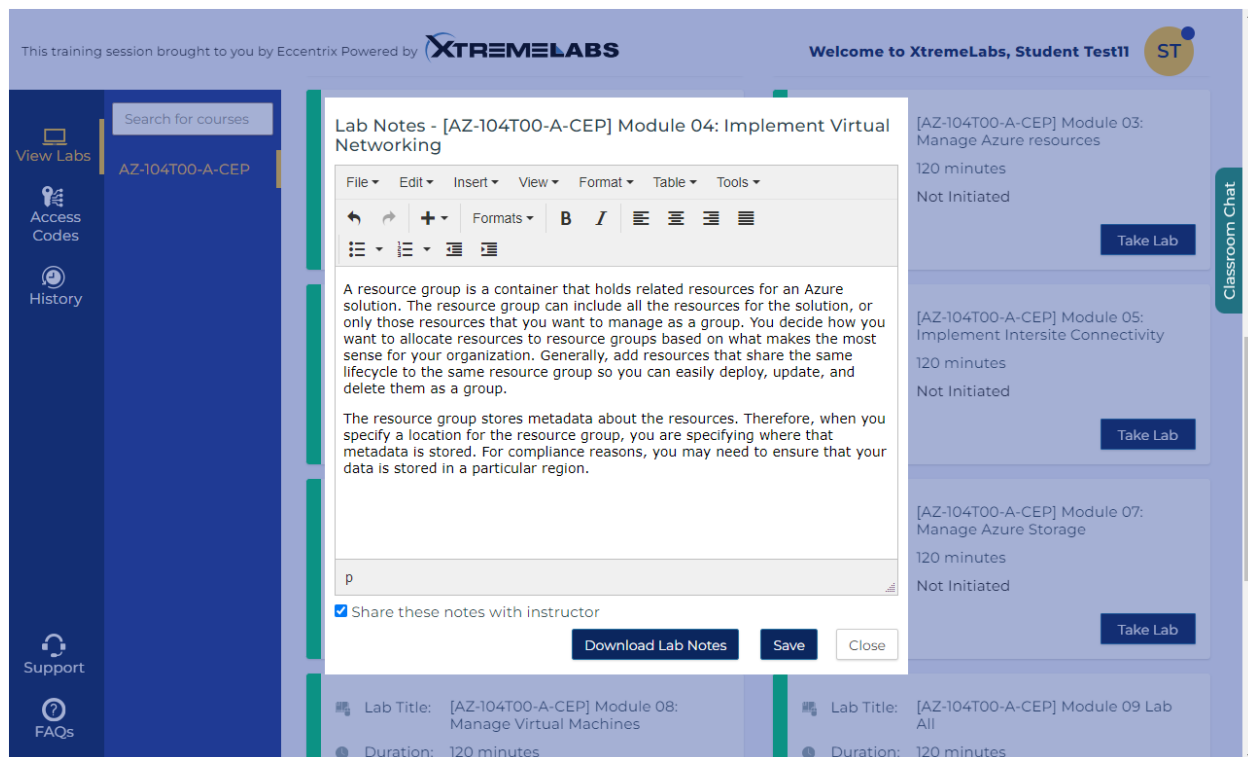

Address	64.64.206.12
O365 Blob	AdatumAVKPMX
UPN name	AVKPMXa

Lab Notes –  This button allows the lab users to add notes to each lab module and save those notes for later use. The lab users can also save lab notes and share those with their instructors. Once saved, lab users can access their lab notes in the lab environment and the lab portal. The users can download the lab notes for saving them for later use.

The lab notes can also be detached by clicking on detach lab steps option besides the lab timer.

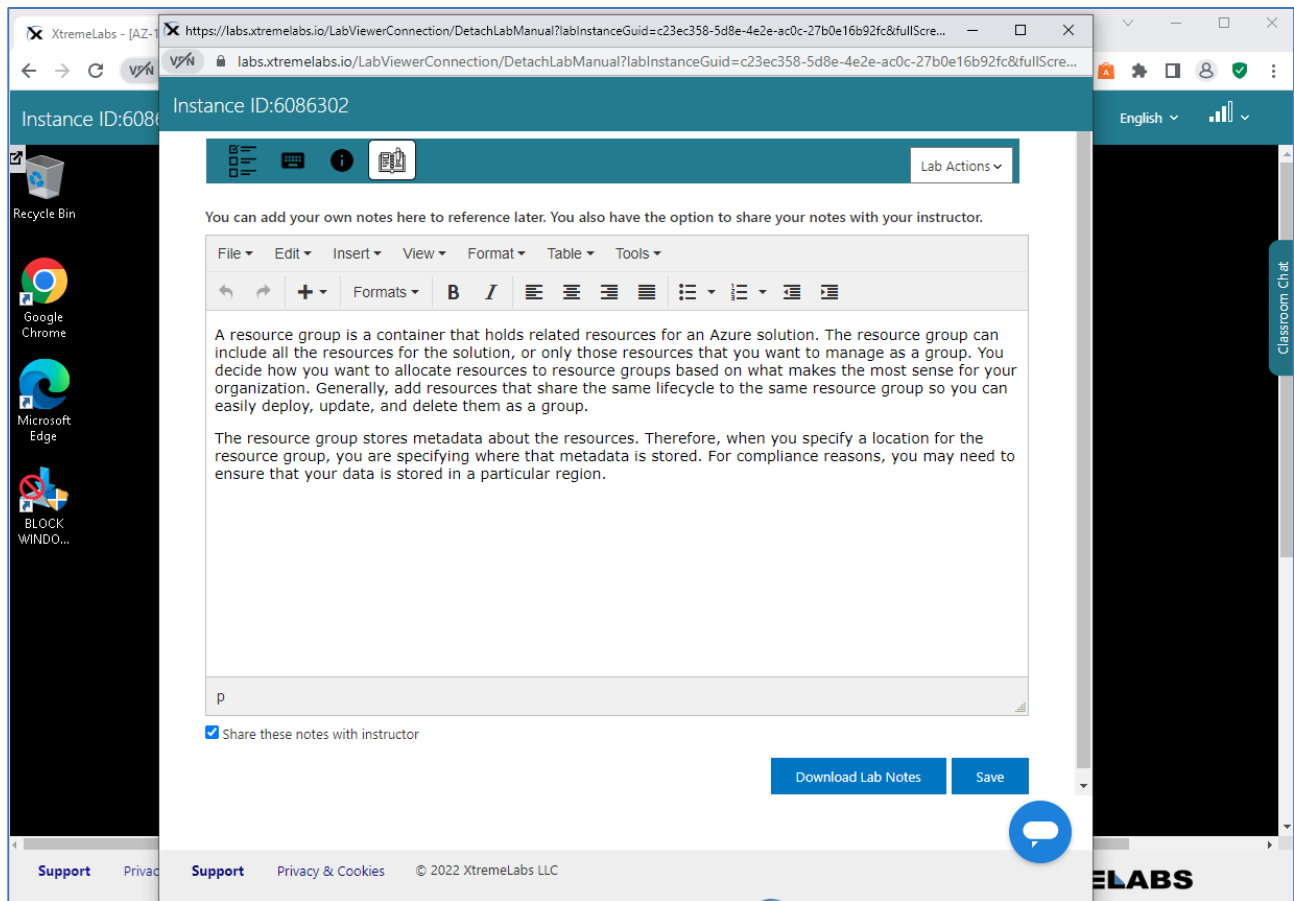

It allows the lab users to have more screen space for their VMs and detach their lab notes/lab steps overlay to an additional screen/monitor. The VM screen adjusts automatically to its default screen resolution when users click on the **Attach/Detach Lab Manual** button.

The users can close the browser to get the lab steps to overlay back to their VM browser window.

This is how lab notes look when detached from the VM to an additional monitor/screen.

Lab Actions Menu -

This menu has the following options for the users:

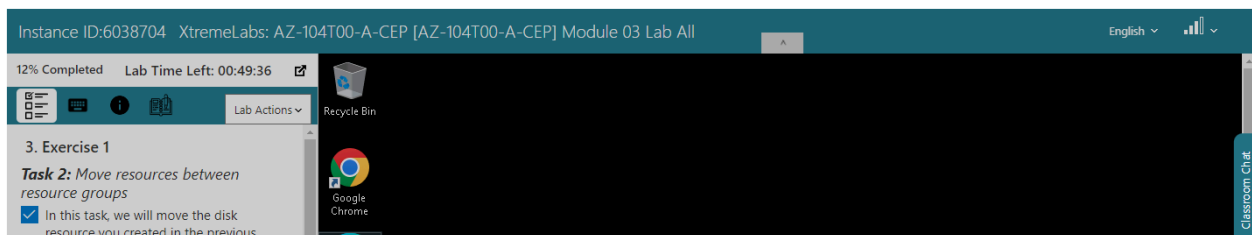

- **End Lab**
- **Save Lab**

End Lab –

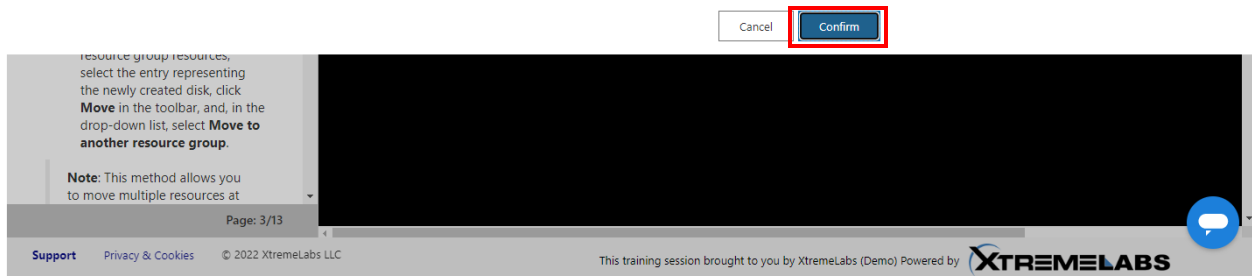

Click **End Lab** to close the Lab and terminate the virtual machines in the lab module.

You will be prompted to confirm that you want the Lab to end. Clicking on the **Confirm** button will end the Lab.

Are you sure you want to end this lab?

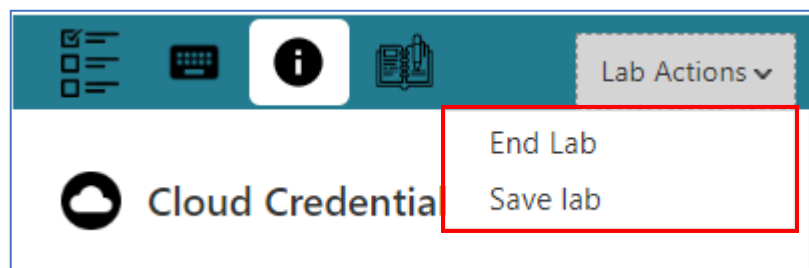

Click **Confirm** to close the Lab's browser tab and return to the Labs Portal.

Note: Ending a lab means that your current lab session will be ended, and your progress will not be saved. You will need to relaunch the lab module for working in your lab again.

Save Lab

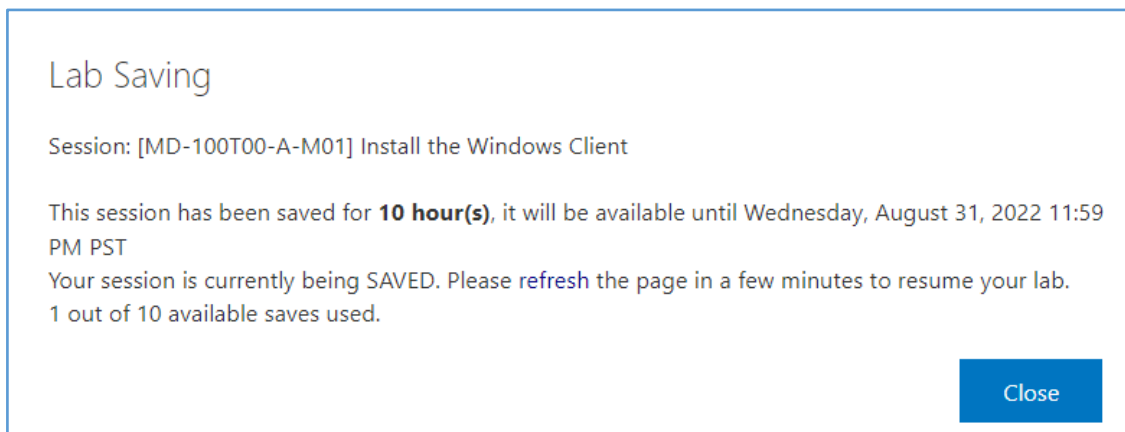

If you want to save your work and complete a lab later, click on the **Lab Actions Menu** besides the **Lab information** Button at the top of the Lab Overlay and click Save lab from the top-down menu. This will save your lab for the duration of your classroom, up to 120 hours, before expiring. When you resume the lab, this option allows an additional 120 hours save duration.

This will save your progress, and your work will be stored for up to a maximum of one hundred and twenty (120) hours.

Note: The **Save Lab** function is not available on some labs and is only available for labs associated with XtremeLabs user accounts. The save lab function is not available in labs which contains Cloud Express Pass (CEP) for Azure, AWS, O365, and other cloud resources. The resource limitation does not allow the users to save their lab modules, but they can always complete their lab within the standard lab duration which is 120 minutes. The save lab option will only appear in the **Lab Actions** drop-down menu if it is available in your course for your launched lab module.

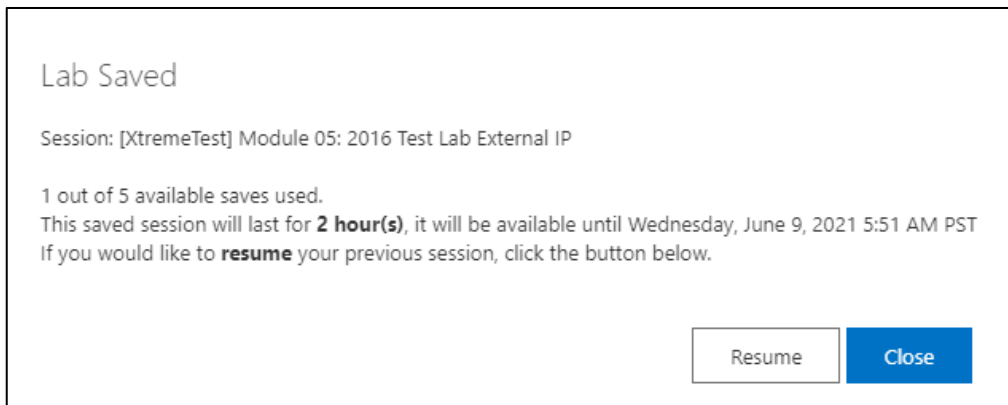

Saving the Lab will take you to the **View Labs** page, where a tile of your saved lab module is displayed. During the saving process, you will see the following **Lab Saving** pop-up description:

Note: The **Save Lab** function allows the users to save their lab module for a maximum one-hundred and twenty (120) hours duration. The duration is requested by each individual instructor/admin and set up by XtremeLabs. Users can utilize the save lab function for maximum ten attempts per lab.

Once the saving process has been completed, the Lab Saving pop-up will state the date and time your saved lab will be available until.

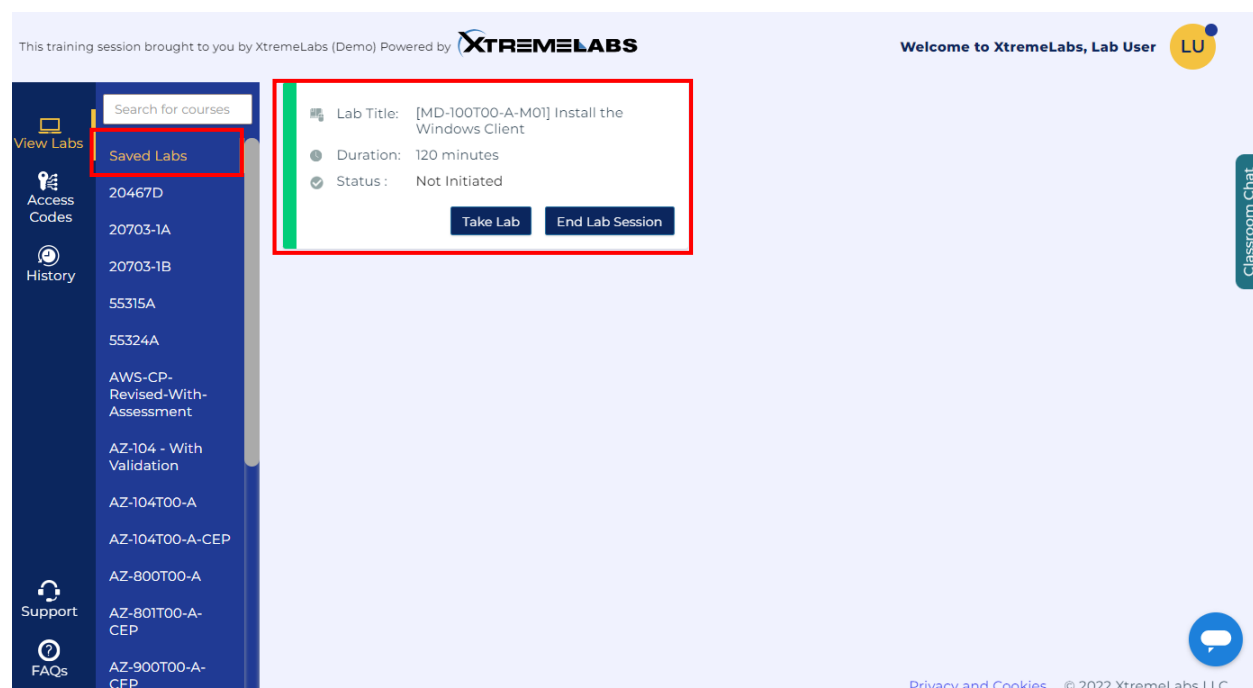

After the completion of the Lab Saving process, you will see the following pop-up description:

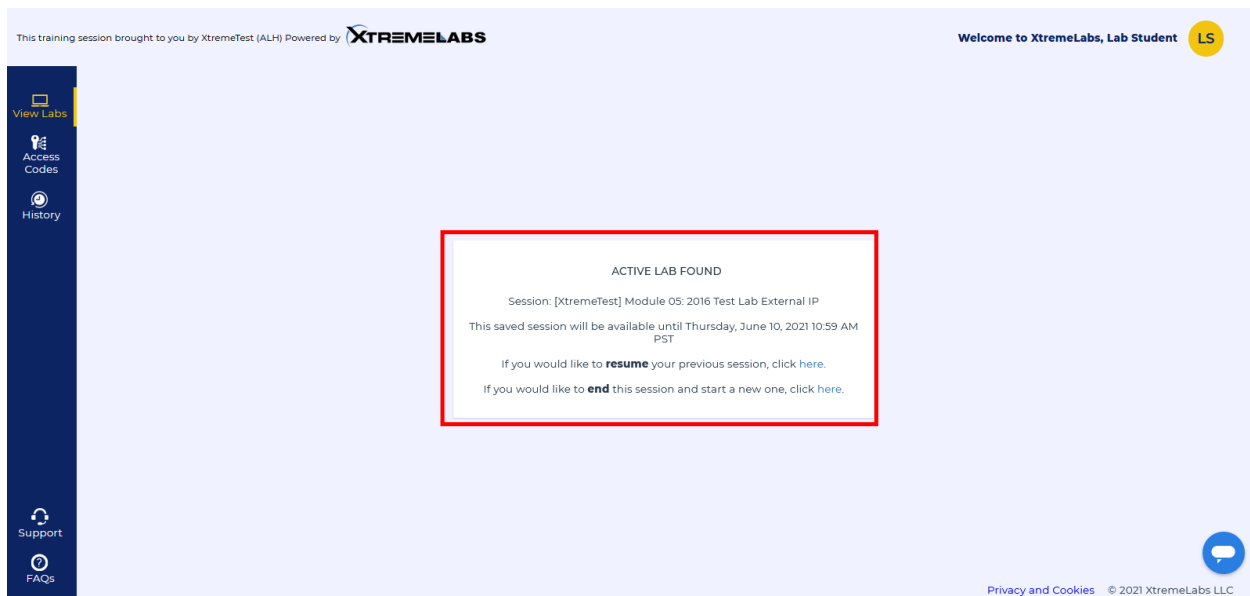

By clicking on the **Resume** button, you can resume the lab any time until then. After that stated date, your saved lab will be deleted.

You can resume the lab from the **View Labs** page. At the very top of the column of labs will be a link to the Saved labs. Select that link, and the tile of the saved lab module will be displayed.

You can see it on the next page.

When you click the **Take Lab** button, you can launch your saved lab within the lab saving duration (maximum 120 hours). Clicking the **Take Lab** button will restart the lab where you left off. By clicking the **End Lab** button, you will lose your saved progress. If you have saved a lab and sign out of <http://labs.xtremelabs.io> and then sign back into the site within the Lab save timeline, the **View Labs** page will open with the **Saved Labs** entry pre-selected to remind you that you have a saved lab waiting for you:

Note: Only one (1) lab module can be saved at a time. If you already have a saved lab and you want to save another, then it will overwrite the first saved lab module. A pop-up menu will appear and ask you to continue with overwriting the existing saved lab module.

Virtual Machine Window

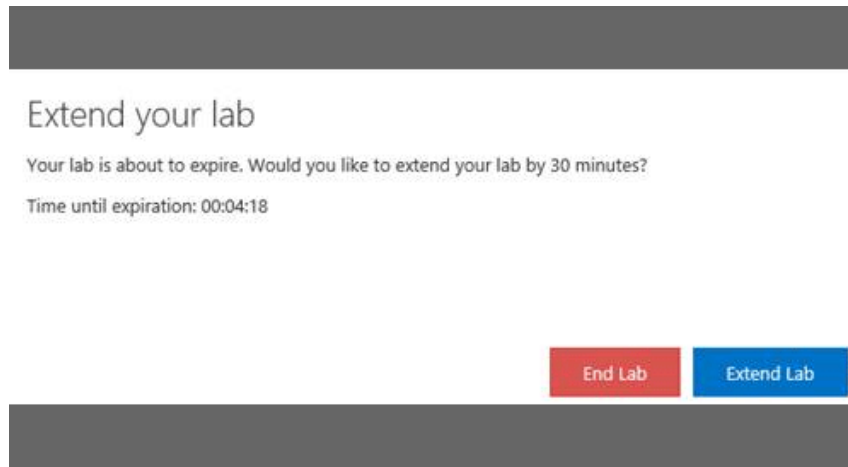

This is the large window that fills most of the lab view. This window allows interaction with the virtual machines that form the virtual labs.

Only one virtual machine can be active in this window at a time. Use the virtual machine selector (identified earlier in this guide) to switch between virtual machines in a lab module.

If the focus is within this window, the keyboard and pointing device will control the virtual machine.

Note: Instructions for logging into and interacting with the VMs should be in the Lab manual documentation. You can also find these instructions within the Labs environment on the left-hand side. However, the most used Administrator passwords used for Lab VMs are **Pa\$\$w0rd** and **Pa55w.rd**.

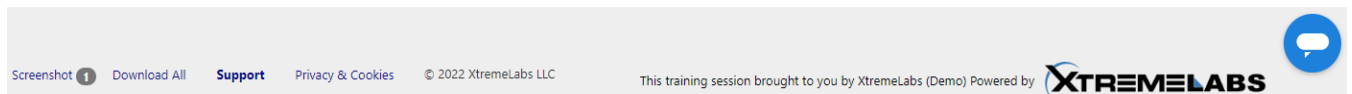

Once launched, labs will run for their stated durations. At the end of this period, the lab will be disconnected, and a message will be displayed. This message informs you that the lab is about to expire, and it allows you to either end the lab or extend the lab for an additional 30 minutes:

Five (5) minutes before the lab period ends, the pop up will appear asking you to extend the Lab. Extend Lab button will help you to extend the lab duration to 30 minutes before the lab is automatically ended.

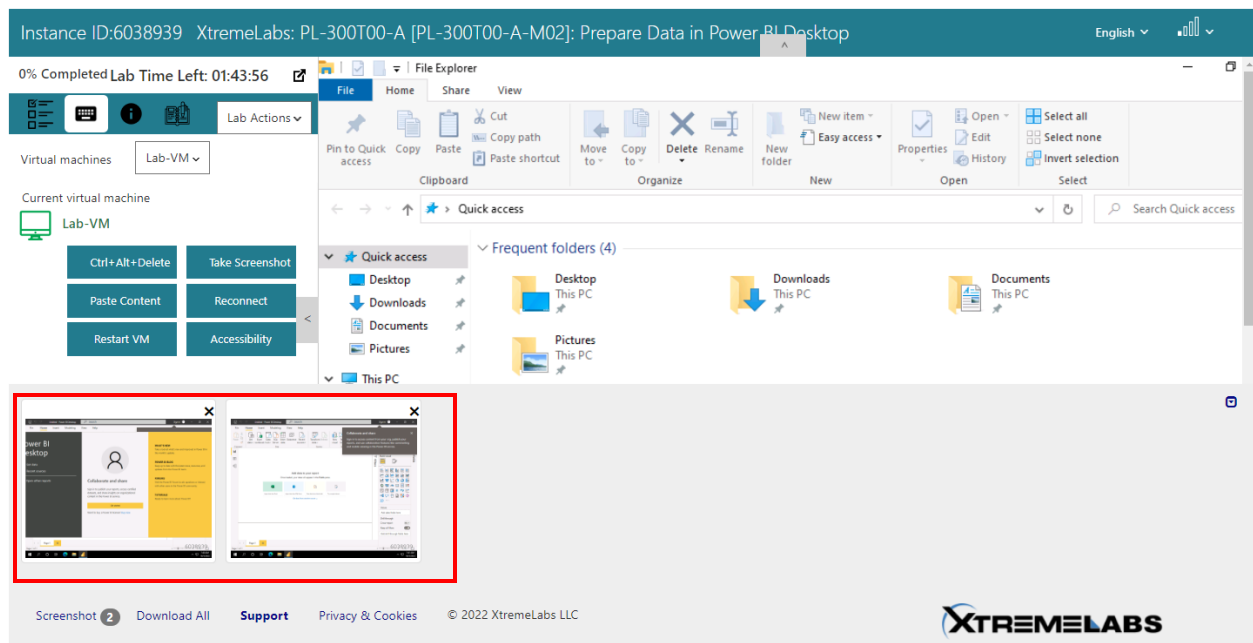

You can end the lab at any time while this message is displayed by clicking on the End Lab button.

Footer

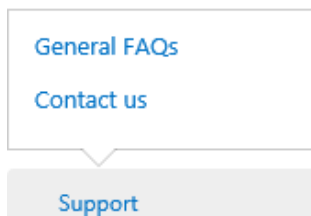

The Footer has four elements: The **Screenshot (Count)**, **Support** link, the **Privacy & Cookies** link, **XtremeLabs** link, and the **Live Chat Icon**.

Screenshots (Count) – click **Screenshot (count)** to see all the captured Screenshots of your current VM. All these screenshots will be visible to your instructors as well.

Support - Click **Support** to open a menu with two text links: General FAQs and Contact us.

Click **General FAQs** to view a .pdf file of the Frequently Asked Questions.

Click **Contact us** to open a pop-up form for sending an email to the XtremeLabs support team. This form also provides the toll-free number to contact the XtremeLabs support team and a Chat now button to initiate a chat session with a Support team member available 24/7.

Observed Holidays

- New Year's Day
- U.S. Memorial Day
- U.S. Independence Day
- U.S. Thanksgiving Holiday
- U.S. Christmas Holiday

* Please use the chat widget on the lab viewer to start a conversation with support.

To send an email to the XtremeLabs support team, fill in the text input boxes with the appropriate information and click **Submit**. You need to check the **Attach Screenshot** checklist button to report any error in your current VM. This option will automatically select the most recent machine-captured screenshot.

Note that the text input boxes denoted with a red asterisk (*) cannot be left blank.

After you click Submit, you will see an acknowledgment that the email has been sent. The XtremeLabs support team will contact you shortly.

If an issue is urgent, call the XtremeLabs support team using the toll-free number provided on the form or click **Chat now** during the listed support hours. (The listed support hours are in the Pacific Time zone.)

Chat Icon  -XtremeLabs Live chat support allows you to request support assistance within the account portal.

Account Settings

To make changes to your account settings, click on the **Account Settings** option on the top right side of the account portal:

The screenshot shows the XtremeLabs account portal. At the top right, a user profile icon labeled 'LU' has a dropdown menu with 'Account Settings' and 'Log off' options, highlighted by a red rectangle. The main content area is divided into two columns of lab cards. Each card displays a lab title, duration (150 minutes), and status. The left sidebar contains navigation links: 'View Labs', 'Access Codes', 'History', 'Support', and 'FAQs'. The top of the page includes a search bar and a welcome message: 'Welcome to XtremeLabs, Lab User'.

This will allow the user to make the following changes to their XtremeLabs User Account:

- i. **Password** – This allows you to change your password to log in to the XtremeLabs platform.

The screenshot shows a 'Change Password' form. It contains three input fields: 'Old Password *', 'New Password *', and 'Confirm Password *'. Below the 'New Password *' field, there is a note: 'Case Sensitive, Minimum 7 Characters'. At the bottom right of the form is a blue button labeled 'Change Password'.

- ii. **Name** – This allows you to change the name that the XtremeLabs platform knows you as.

UPDATE YOUR NAME

To update your name, change the fields and select Update name.

First Name

XtremeLabs

Last Name

Instructor

Update Name

- iii. **Delete User** – If you are done using the XtremeLabs platform and are concerned about your privacy rights, you can have all your records deleted from the XtremeLabs platform by clicking the Delete Account button found here.

DELETE ACCOUNT

If you choose to delete your account, access to this site will be lost and all labs will become permanently inaccessible.

Delete Account

Note: This option will permanently delete your account and the access to all linked resources will be lost. This cannot be undone.

Troubleshooting

If you have trouble connecting to the lab images once they have launched, the information in this section may help identify the issue.

Advanced Firewall Configuration

By default, the lab hosting system offers connections to lab virtual machine console sessions from an end user's web browser via the embedded HTML5 protocol.

Internet proxy/firewall client

First, install a client proxy agent on your machine and then configure that client to connect to the Internet via the proxy/firewall server. If your network is protected by Forefront TMG, for example, you will need to install the Forefront TMG client on your machine and configure it to connect to the Internet via the gateway. The TMG client can be downloaded from the [Microsoft Download Center](#). Other firewall/proxy products typically have an equivalent client agent.

- **Firewall configuration**

Suppose the firewall has been configured for packet inspection (that is, the rules are sensitive to the protocols running over certain ports). In that case, the outbound rules on the firewall need to be altered to allow the RDP protocol to run over port 443 to the specific addresses used by the lab portal. Namely:

Destination IP address ranges:

67.21.174.1 through 67.21.174.25

67.21.175.69 through 67.21.175.88

67.21.173.141 through 67.21.173.150

Destination port:

TCP 443

Protocol:

RDP

Note: Configuration of access to port 443 for RDP traffic is beyond the scope of Internet Explorer proxy settings.

Support

If you have technical issues with the online labs, you can contact the XtremeLabs support team. Examples of technical issues include:

- The virtual desktop does not display.
- The online Lab runs slowly or is non-responsive.

If an issue is urgent, call the XtremeLabs support team using the toll-free number provided on the form or click the link to initiate a chat session with a team member. Chat and phone support are available during business hours. Email is available 24/7.
